MYSTERY OF BERMUDA TRIANGLE

'Mystery of Bermuda Triangle'. The main content of this small book is regarding the place in the ocean which is known as 'Bermuda Triangle'. Because this place is situated near an Island named Bermuda, that's why it is called as Bermuda Triangle. Some call it as Devil Triangle because they believe that Devil stays in that place. Nearly 20 years back I read in a leading newspaper about this Triangle, it was written that in 1947 Six American Air crafts went missing in Atlantic Ocean and no information regarding them till now. Previously many went missing in this Triangle shaped ocean which is beside America, this was the matter written in that news paper. At that time I felt it like a wonder. After some days I read regarding Bermuda Triangle somewhere else. In that place ships, aeroplane's disappeared and the persons who went for research to know the reason behind it also dint come back. Then I started thinking about Triangle, what I thought was!

It is meaningful to say that ships disappeared when they were traveling, but it is meaningless to say that aeroplane's traveling in sky got disappeared. If it is realistic that aeroplane also disappeared at that place then I thought there is some mystery over there which human being doesn't know.

Thing which attracted and made me think in this matter was, in English it is **"Triangle"** in Telugu it is called as **"Moodu Konamulu"**. The reason for getting attracted to this name was, totally the whole universe is based on number 3. In this world the divine knowledge is also based on number 3. What is this new thing? Till now nobody has said about three! You have a chance to Question me. For this our reply would be in spiritual study we have recommended "Doctrine of Thraitham" on base of 3. Previously before me, Adi Shankaracharyulu has recommended Advaitam, Ramanuja charyulu has recommended Visishta Advanitam, Madva charyulu has recommended Dvaitam, still denying all these we had introduced new doctrine called Thraitham. Previously Dvaitam or Advaitam was told but their doctrine's dint have proper base. That's why in spiritual study they are considered as a building without foundation and pillars, however, it will be demolished by knowing this, we denied them and God himself told in Bhagavad-Gita Purushottama prapithi yogam verses 16, 17 based on that we have introduced Thraitham. Thraitham which we have told and the triangle in the ocean are very near to each other. That too, triangle was not understood by anybody, means, it

The Mystery of Bermuda Triangle

is linked to Thraitham what we have told is clear. As Thraitham is already in Bhagavad-Gita and not understood, researches said triangle is also in the ocean but still not understood. We thought that the mystery of Bermuda Triangle, the prohibited area in the ocean can be known only by Doctrine of Thraitham.

To know about the Triangle in the ocean, first one should know at least little about Thraitham doctrine, and then only one can understand. So, Bermuda triangle was a mystery to everyone and nobody understood it but I thought we can know the mystery through Thraitham. As I thought, I started taking things in Thraitham Doctrine way then I could able to recognize the triangle. What is present there, what is happening, why it is happening I could easily recognize what all I understood regarding Triangle, others also should know about it, so am trying to tell you through this book "Thriathakara Rahasyam" (Mystery of Bermuda Triangle). In this book all the matters are known and told according to the Sixth shastra "Brahma Vidya Shastra" which is the last and biggest one. In spiritual study depending on one doctrine all this matters have been revealed and that too scientifically. Not even single issue in this book is untrue and unscientific. Through this book one will not only know about Bermuda triangle but also the spirit present in them, by which he may learn more about Divine knowledge and become Atma jnnani.

Few may get doubts on this book, like! How he is telling all these which American scientist also could not tell? He is sitting here and telling, is this true? They might think. Getting such doubts is not wrong. Do not blindly ignore my words, you only can think and decide whether it is true or not. This Book is not only related to Triangle but also the disasters like earthquakes, tsunamis, volcano etc. The ships, aeroplane's which gone missing in Bermuda Triangle, in that, clouds play an important role. As I already told that clouds are very powerful. In 1940 a small plane was struck in the clouds near the triangle, only to reveal that they (clouds) are doing this work, they (clouds) left the plane without harming it. The pilot who was in the plane said about the incident as follows. "The plane which traveled @ 104kmph speed as it went near the triangle, got struck in clouds and traveled 180kms in just 3 minutes (according to this speed is 3600kmph) there is no chance of that plane to travel at that speed. Above all engine was down and fuel is not used and navigator also dint worked. By his words we can understand that clouds only had done this, to make us feel their presence and power. It is also understood that if any thing struck in clouds, they

The Mystery of Bermuda Triangle

can take all the way, to any place; it is proved with this incident. Similarly no one knows the super power present in the Triangle. Though we dint get any live evidence but still with spiritual study, I could tell what all happened over there (Bermuda Triangle) in this book to certain extent. Many mysteries will be known with this book and I expect future generations will get a chance to know about spirit.

To give gist about this book I have given this introduction. I expect this book will help you in all ways to go further in spiritual aspects.

With Regards,

Acharya Prabodhananda Yogeshwarulu

THE TRIANGULAR SECRET - **BERMUDA**

"INDU" means The MOON. MOON is the master of wisdom and indication for wisdom. That's why Parvati's husband Shiva also wore half moon on his head to represent that he has divine knowledge, he is a Jnani. That's why we consider the meaning of Indu is "Jnanam" (wisdom). "Akshara Parabrahma Yogam" 25th verse in Bhagavad-Gita Lord Sri Krishna said "Chandra Manasa Jyothi" considering Divine knowledge. So in spiritual aspects 'Indu' means "Jnanam" (wisdom). Wisdom is two types on Earth i.e. 1st Godly wisdom and 2nd worldly wisdom. It may be any wisdom but there is something known as Science. Wisdom is known to intellect, science is known to senses. Science can be known through senses i.e. it can be seen with eyes, can be heard by ears. The knowledge of sciences will be known only through intellect. For example learning a recipe from someone is Jnanam (wisdom) and doing the recipe as intellect informs is said as Science. By this it is clear, as wisdom when practically applied is science. Science can be experienced by anyone. A recipe made by a chef with his knowledge can be experienced by hundred people. Though the person doesn't know the preparation of recipe still by one's knowledge anyone can experience. Let us take an example of mobile phone. The inventor of mobile phone was one individual but later by knowing the knowledge of it others also manufactured with different brand names. The person who invented at first was only one but later ten persons learned it (10 companies') people using cell phones are in millions. Remember that all the people using mobile phones don't have its knowledge. The first person who invented reveals out that is Jnanam (knowledge). Anything invented according to Jnanam when comes to practical usage it is Science. The whole country has become scientifically rich, because of few Jnani's; the fact is many are enjoying luxuries, because of Science.

If we observe all these carefully we can understand Jnanam and Vignanam are different. Vignanam is called as Science in English. Science is based on Jnanam which is called as super science or super knowledge in English. Jnanam is of two types one is worldly Jnanam and second is Paramatma Jnanam. Worldly Jnanam is called as super knowledge and Paramatma Jnanam called as super science. Some call divine knowledge as super science. We also refer like that only, now let

The Mystery of Bermuda Triangle

us discuss about worldly Jnanam matter is, "karuru" is the place where diamonds are extracted so it is named as "vajra karuru". Till now, many found diamonds at "vajra karuru", in that there are small diamonds, big diamonds and medium diamonds. Depending on their size and shape they may be valued from thousand rupees to millions of rupees. All the diamonds were not found at a time. Let's assume it took hundreds of years to find all these diamonds. Not only that but in future also one many find diamonds there. From hundreds of years many have found diamonds of different sizes and dimensions, that is, everyone has to agree that all these diamonds are present there before itself. The diamonds which are already there were found by different person in different sizes. The world famous "Kohinoor diamond" was also found at Kurnool district Nallamalla forest. That diamond was found by a Muslim named Kohinoor that's why it is named as "Kohinoor diamond".

There are different types of diamonds, different types of scientific tools, equipments and machines on earth from the beginning which are related to Jnanam. The diamonds which is already present in earth was discovered by someone, somewhere at some time.

In the similar manner, already present knowledge will be known by somebody. The first person who tries to find a particular diamond will found it. The knowledge of a particular thing will also be known to the person who tries to know it. First of all a diamond is found by particular person, then later many will see it, in same manner the knowledge which is known first by a person later, will be known by many and it may be useful to many persons. Here the main point to be noted is a person who goes in search of diamonds, when finds one, he will say I found it. But when a person is doing research on a particular thing and if he comes to know anything and any clue regarding the matter he tries it and reveals that he has invented or discovered. Previously there were no Radio's but in 1866 A.D. Marconi invented it, in his known method. If a diamond is found and extracted means it is already present in the Earth. Similarly, if a person invents a thing or a machine or a doctrine, it should be understood that it is already present on Earth unknowingly. **Already which is present on Earth only will be know, but, not which is not present.**

These days what all we have invented computers, aeroplanes, Skylab's, atom bomb, cell phones, televisions etc. All these knowledge is accessible already,

The Mystery of Bermuda Triangle

we need to understand. It has to be understood that what all man is enjoying i.e. comforts and luxuries. God has created at the time of creating universe and he also created so many things which we still didn't invent also. Some atheists don't accept my words. To say, my words are wrong, they don't have any scientific reasons. But what we are telling from the beginning, that, there is creator and he created everything are totally scientifically proved. In them, scientifically they are not correct. But my words are scientifically correct and we will let you know later. The main formula is to prove an issue scientifically; we should also try to prove the issue is not scientific. Hence, following an unknown method blindly is not scientific.

As we told before Jnanam is of two types, one is worldly Jnanam and other is Paramatma Jnanam. Already we told science is there with worldly Jnanam and Paramatma Jnanam. Shastra is base for science what we know, any Jnanam or any science will not be there without related in shastra. 5 shastra's are based on worldly Jnanam and one shastra is based on Paramatma Jnanam which we have been telling you from the beginning. Brahma Vidya shastra which is the Paramatma Jnanam, is the best and the sacred one than the remaining other 5 shastra's, which are related to worldly Jnanam.

In the above paragraph we discussed little about worldly Jnanam. Till now what we know is worldly Jnanam and the one which teachers are teaching us from primary school to university. Worldly Jnanam is known through teachers. The worldly Jnanam which we are seeing and which is known are in the form of science. For this we can know that worldly Jnanam is experienced by all in the form of science. If we discuss about Paramatma Jnanam it is the divine knowledge known from a preachers. Worldly Jnanam is seen in the form of science but Paramatma Jnanam is not seen. Here we should understand one thing, that through worldly Jnanam a computer is prepared not only the person who prepared it but others also can experience it. Here in Paramatma Jnanam whoever knows Jnanam and behaves accordingly, the happiness which derives through it can be experienced by him alone. If we go into the matter in detail, the science which has been introduced through divine knowledge, the person who knows Jnanam (divine knowledge) only enjoys it. According to worldly Jnanam if anything invented through science everyone will experience it but here in Paramatma Jnanam, the person who knows the divine knowledge only can experience it and that experience belongs only to him.

God revealed all the information related to him (Paramatma Jnanam) before itself, so that there is no need for man to invent like worldly Jnanam. Nobody has revealed anything about worldly Jnanam before itself. As the time passes on the things are invented by man and known from there onwards. So the difference between worldly Jnanam and Paramatma Jnanam is clear now! Not only that but in Paramatma Jnanam there is a wonder & that is! If you can understand the proper meaning of Paramatma Jnanam the science related to it can be understood. **The divine knowledge which is understood according to the meaning which God revealed it, that also, who knows the divine knowledge, he only is experiencing its science.** Not only that but there is another method in this. The science related to divine knowledge shows some evidences regarding Gods presence before itself. Similarly, previously known super science is not at all related to worldly Jnanam. Any doctrine or any Shastram did not define this science.

When it is known to everyone and experienced by every one and it is not related to worldly Jnanam then it is definitely related to Paramatma Jnanam. Through the super science we can know about Paramatma Jnanam. Similarly, the super science can be known and experienced by the knowledge revealed by God. If you understand the super science which is revealed by God but not by man then only you will know the divine knowledge. And also we can know the science which is told by God but not by man. Worldly Jnanam was not there from starting, it's a science which came into existence later. From this we can understand that! Jnanam related to world is tangible; it is easily understandable to everyone. Similarly science related to world is tangible and easily understood. But divinity, divine knowledge is not tangible. Similarly, science related to divine knowledge is also not tangible, so world related science is easily understood to man but the science related to divine knowledge is known to the person who will know it, but not even his neighbour will understand it or know it. That's why divine knowledge is not spreading as much as worldly Jnanam. This is related to human beings. Human beings are not only in our country but also in foreign countries also. So in present days no country people are showing interest & eagerness towards divine knowledge. Now a days in every country the machines are working mostly, worldly Jnanam has increased. Not showing any interest on Paramatma Jnanam. Man who has manufactured deadly weapons has developed ego, ignorance and is feeling that he is great. Man is thinking God is only for namesake and who doesn't

The Mystery of Bermuda Triangle

know shastra's believe blindly that God is there. In every country 80% people say God is there and from that 95% people knows what divine knowledge is. There are many people who think if we say God is not there something bad may happen, with this scare they say that God is there.

INDU COUNTRY

On comparing olden days and present days. In olden days in Indu country the people had divine knowledge. World culture is increasing so man is learning many studies and he is losing belief on divine knowledge. At last big percentage of people are losing beliefs on divine knowledge. Now, in our country people are forced for studies, after studies job, then earnings, no other taught than this, this is the present conditions.

Some are having Bhakti on Goddesses but not on God. That Bhakti is also selfish one, to clear their wants. Now-a-days Bhakti is used for selfish politics. Many groups came up to secure their caste and dharma. Similarly in divinity our country India is so backward. Previously it was in such a way that! Even if we don't know about Krutha yugam but when it comes to Thraitha yugam our country India stood in very high position according to divinity and spiritual study. In those days India was famous for divinity and divine knowledge.

Afghanistan, Pakistan and Bangladesh were a part of India in previously. Not only that even Srilanka and India were together. Now ocean is between India and Srilanka but previously it was not there. In those days because of big cyclones there occurred a lake between Srilanka and India. In some places the water body was not even a half a kilometer. That water was flowing in the east and west into the ocean. Like, now a days in between Srilanka and India there was not some kms of distance, to sea. In some places between India and Srilanka there was no water at all. In that place both the countries were together. Though Srilanka was together with India still it was a separate kingdom and was ruled by different king. In north Pakistan, Afghanistan and Bangladesh were as one but now they are different countries. Though there was one at that time of history, it is written as north and south was ruled by different kings at the same time. Present Delhi was known as Hasthinapur in Thraitha yugam. North Hasthinapur was ruled by a

The Mystery of Bermuda Triangle

different king and the southern part of the country for which Ayodhya was capital was ruled by Dasaratha and Ram and they family members for some period. Indian kings ruled Srilanka for some period in krutha yugam and Thraitha yugam but before Ram's period and after his period Srilanka was ruled separately without any relation with India.

Though India is present in continent Asia, in north Himalayas are standing like a big wall and looks differentiated. Because India has sea in all the sides it is treated as special continent and called Indian continent by some of them. Though India belongs to Asia continent because of Himalayas it is seen as special continent. Though Srilanka is situated in the down very much below physically it is very powerful country, one should understand. Asia is the biggest among all the continents in the world. In that India is the biggest country which is not only seen as a separate continent but it is like motherland for spiritual power and spiritual study and divinity. To reveal dharmas, God has taken birth previously 5 times and 6th birth also in India only. Because of God's birth India is special. In the 6th birth God revealed all his dharmas, so India is considered very special. There are 194 countries in the world and still God has taken all his births in India only, so with these we can say India is really a special country.

INDIAN OCEAN

The creator of the world is only one, he is Paramatma. He is also called as God. God is very powerful, bounded to dharmas and he is without any form. Such God is unknown, who is he? Where is he? How is he? Such great person when takes birth on earth. Divine power (Atma Shakti) will gives hints of his presence on earth and even wont move from earth. Earth consists of 73% water and 27% land. Srilanka is situated below to India and fully surrounded with water. India consist water on three sides and Srilanka consists water on all the sides and as if touching India on one side, we can see the same in the atlas. Because, presence of water between India and Srilanka, Srilanka looks as special and a small continent. In continent Asia, India looks as separate continent and Srilanka looks as separate continent divided from Indian continent. Ocean is the big reason for dividing the Srilanka from India.

The Mystery of Bermuda Triangle

Though land is divided into small parts as continents but ocean's are not divided, but, named each ocean using the land surrounded in that region. Similarly, the water flowing down the India and Srilanka is called as "Indu Maha Samudhram" (Indian Ocean). Nearly 70% water and 30% land is there, that too the ocean situated down the India was named as "Indu Maha Samudhram" (Indian Ocean) in krutha yugam, itself. Though the time is passing on from the world exists, in the first Yuga i.e. krutha yugam itself the water flowing down the India was named as "Indu Maha Samudhram" (Indian Ocean).

Because India is situated in the southern down part of India, that's why it was named as India. As the time passed on instead of Indu country, it is being called as Hindu country. As God told, as the time passes dharmas will become adharmas, the meaningful name has been changed to meaningless name India. Leaving the meaningful and great name, which was named because of "Indu Maha Samudhram" (Indian Ocean) in the south? But using the name of the river which is flowing in north named as Sindhu River which doesn't have any importance and meaning that name is being used. It is said that because of River Sindhu only India got its name, is it not the stupidity! Some Hindu's say because river Sindhu is flowing in our country that's why our country is Hindu country, to what extent it is justified let us think little about it. Many questions arise because of this act. First one, if the country is named because of Sindhu River then it should be named as Sindhu country but not Hindu country? If it is changed over a passage of time, then why are we not changing the countries name as Sindhu country now?

Is there any perfect reason to call as Hindu country just because of River Sindhu? Instead of using the name of Normal River which doesn't have any greatness for such a big country, why can't we use the name of holy river Ganga for naming the country and call as Ganga country. Another biggest river in India is Brahmaputra, why can't we name our country by calling as Brahmaputra country? Sindhu River flows in Pakistan but not in India, so they have named a state as an honour. There is a meaning if Pakistan name a state based on river Sindhu but in what way it is meaningful to name Indian based on the river. Some of the Hindu's have formed few associations and saying we are protecting Hinduism and insulting us. I want to question such persons. Do you know India's past history? Do you know that India stood first in divine knowledge and spiritual knowledge among all the countries? In India only God came as Bhagavan and told the Dharma's, do

The Mystery of Bermuda Triangle

you know any one of it? Do you know the meaning of the word "Indu"? A person who doesn't have any divine knowledge should not say they are Indu's. Not only that person, those who are not related to divine knowledge feeling as though they are not Indu's. Now-a-days that who doesn't know divine knowledge and divine Dharma's calling them as Hindu's which belongs to our neighbour name.

Other name for divine knowledge is 'Indu'. Among all the countries in the world, India stands first in divine knowledge, that's why it has been named as Indu country. Indu country means divine country. People living here have divine knowledge, that's the main reason to get country name as Indu country. But some ignorance say, our culture is Sindhu culture and the name has been derived for it as, Hindu country. They say that the region surrounding Sindhu River should be named as Hindu's. But it is not like that, that's why the word Hindu is meaningless and not there in history. The meaningful word in history is Indu. So let us callas Indu country.

DIVINE OCEAN

India can be proudly called as Indu country, the reason behind is "Indu Maha Samudhram" or "Indian ocean". In this eternal endless universe non-understandable, formless God is spread all over. His power is spread allover the earth, in one place it is situated more. Not only on earth but also in Galaxy, various planets, various stars also his power is stored. Similar method is also on earth. The surface of each is big. In that some lakhs of kilometers the power is spread. In Thraitha yugam, this power was present in the ocean which is surrounded Srilanka which is down in the south of India. Divinity is occupied with dharma; dharma is occupied by divine knowledge. If Jnanam is known then dharma will be known. That's why our ancestors said God's power is also known as Jnanam power (divine power). This divine power is situated in the ocean which is down the India, near to Srilanka, so it is called as Indian Ocean or Indu Maha Samudhram. In krutha yugam, itself yogis who have divine knowledge has named it as "Jnana Samudhram" or "divine ocean". The word Indu is equal to the word Jnanam. So, in that period itself yogis and jnani's every one called Jnana Samudhram as Indu Samudhram. Jnanam power is great to understand this; the word Maha has been

The Mystery of Bermuda Triangle

included for Indu Samudhram i.e. Indu Maha Samudhram. In krutha yugam itself, the word Maha has been added for Indu Samudhram is called as Indu Maha Samudhram. With its power it is encouraging India, Srilanka and giving them some powers. That's why from then onwards Srilanka and India are filled with divine knowledge. On earth among all the countries India and Srilanka stood first for divine knowledge and spiritual knowledge. Here a question may arise for some i.e. divine power is present in south, so the ocean is called as Indu Maha Samudhram. You have said, because of the ocean only, India is called Indu country. And now you are saying Srilanka is also filled with divine knowledge as similar to India. By attaining divine power India has become Indu country and what identification did Srilanka got. Answer for this questions in the next paragraph.

SRILANKA

Because of Indu Maha Samudhram Srilanka ot more benefited than India. Srilanka is near to Indu Maha Samudhram. Many identified jnani's have taken birth in India. India is known as motherland for divine knowledge. India is the base for many jnani's that's why it is being called as Indu country. Still there are evidences that Srilanka is more benefited than India. They are, in world according to spiritual concept liberation (moksham) is greatest thing followed by Jnanam. Jnanam makes us to known about the God where as liberation means absorbed by God. So, the yogi's who tries to attain God is Great than the yogi who knows about God, it is also said in Bhagavad-Gita "Atma samyama yogam" in the 46th verse,

*"Tapasvi bodikho yogi jnani bopi mathodikaha,
Karmabyadhikaha yogi tasmadyogi bavarjuna"*

In the above verse a yogi is greater than, a tapasvi, a jnani, who does karma. So God himself told to Arjuna to change himself to a yogi. India got Jnanam, so it is called as Indu country, but, Srilanka got liberation (moksham) which is greatest than Jnanam. India is known as motherland for jnani's but it is known that who has taken birth in Srilanka has attained liberation. According to jyothishya shastra moon is the master of divine knowledge i.e. moon is the indication for divine knowledge (Jnanam). Shiva one among trimurthy's also wore

The Mystery of Bermuda Triangle

moon on his head to show that he is jnani. Not only that we are using moon's name for indication of Jnanam every where. Indu is another name for moon. So, in krutha yugam, itself our ancestors have named Indu to represent Jnanam. The word "Indu" is represented as Jnanam and "sri" is represented for liberation (moksham). According to this "sri" is added to Lanka which is nearer to Indu Maha Samudhram and called as Srilanka. We have to remember that which is second nearest to Indu Maha Samudhram is called as Indu country and Lanka which is first country near to Indu Maha Samudhram is called as Srilanka.

Among all the countries in the world, only one country name start with word Sri, that country is Srilanka. Similarly, the name representing Jnanam is only for Indu country. Srilanka which is beside our Indu country has kept up its name as Srilanka, but Indu country got stuck in ignorance (ajnanam) and the power of Maya (illusion) is more in our country, because of this Indu country is now being called as Hindu country. The persons who call themselves as saviors of Hindu dharams has lost the basic knowledge because of their ignorance, not knowing the customs have fallen in the illusion of religion, they doesn't know that Indu dharams are Jnana dharams, though we are telling we are Indu's not Hindu's and the word Indu has become as Hindu in between, they are not respecting any of our words above that they are saying you are in confusion and saying Indu, and warning us to change to Hindu. In certain places like Guntakallu, Mahanandi etc they are treating us as other religion and saying we belong to some other religion.

Now let us discuss about Srilanka. Ravana-Brahma was born in Srilanka in Thraitha yugam. We have heard his history; still it is fresh in front of us in the form of Ramayana. The people who have changed the word Indu as Hindu have been talking ill about the great Ravana Brahma who is jnani not only that he is trikala jnani, yogi and Brahma. Srilanka which is represented for liberation (moksham), Ravana Brahma was born in that country only, Srilanka to attain liberation was sketched as ajnani. We get a doubt, is that the same country which was previously called as Indu country. Now in India much of ajnanam has been increased, though this country has been changed to Hindu country, still as our ancestors has named it as Indu country according to its name somewhere at sometime the real Jnanam has been seen, and has been telling the secrets of Jnanam which nobody knows. And it has been proving that our country is Indu country. In front of all countries in the whole world, to prove that India is the real

The Mystery of Bermuda Triangle

Indu country, this small book Bermuda Triangle (Thraitha Kara Rahasyam) is narrated by us which was a mystery for everyone.

Now if we come to the matter, the 'Sri' in Srilanka is an award given to Srilanka, which represents liberation (moksham). Similarly, Indu which represents Jnanam (divine knowledge) came to our country and said as Indu country. Srilanka is very much near to the Indu Maha Samudhram than Indu country that's why 'sri' which is most valuable than the Indu has been added to Srilanka. Not only that, country is blessed with syllable (beejakshara) 'Lan' means seed letter.

Few words followed by '0' (zero), we call them as syllables (beejakshara). In the word 'beejakshara' (syllable) there exists the word 'beejamu', which means something generates from out of it. With this, it can be said that something is generating from the word 'Lan'. That is, the word 'Lan' is a seed (syllable) which is in possession of some divine power. There exist two divine powers in the universe, viz, universal power and supreme power. Our ancestors have denoted them with two different syllables (beejaksharamulu). As prescribed by them, the syllable 'hreem' denotes universal and 'Lan' denotes supreme power. The word "om" or "sri" denotes the supreme soul (Paramatma). Except for Srilanka till now, no country boasts of a name prefixed with beejakshara and syllable 'om' or 'sri'. Even Bharat (India) desh does not have the privilege, though it's located adjacent to Srilanka. It can therefore be said that, either it is the name or meaning or the divine power; Srilanka is several times greater than what India is.

We have known the power that exists in the words 'sri' and 'Lan' of Srilanka. That last word in the name Srilanka, 'ka' has no meaning. Some alphabets which are pronounced at the end do not have meaning. Their utility is restricted only to complete the word. For example, if we take the word 'shapamu' (curse), only shaapa denotes the meaning (curse), whereas the end word mu has no meaning at all. Similarly the word ka in Srilanka is just an end-word without any meaning. Hence, it should be noted that only the words 'sri' and 'Lan' from Srilanka have a powerful meaning.

RAVANA BRAHMA

Srilanka, which has more significance than India by all means during the Thraitha yugam itself, has been the birth place of Ravana Brahma. As a befitting person born in a befitting nation, Ravana was bestowed with the supreme title 'Brahma' by the self enlightened persons. Even though, some have projected Ravana in negative shades in the history; according to jnani's Ravana is a great person. Ravana is name and Brahma is an award. According to spiritual knowledge the only meaning for Brahma is the biggest. In this world nobody is bigger than the God. So the word Brahma can be used as God's another name. The person who by virtue of being is called 'Brahma' is like a God or is equivalent to 'Eshwara'. How come then that such a great person who is bestowed with the title 'Brahma' was looked down by our historians thereby degrading and insulting him.

If the word 'Ravana' is split into two, it will be Ra+ Vana. In our earlier publications titled, "Mana Pandugalu" (our festivals), the word Rama was given descriptive narration. There also the word Rama was split into two, viz. Ra+ Ma and the meaning was narrated. In fact the word, 'Rama' is not only sacred but a word of glory. Likewise, here too the word Ravana may be split as Ra + Vana. The word vana means forest i.e. it means full of trees. Ra means destructions as we already said it. The word "ram" is the seed letter for destruction, when letter 'ma' is removed from these only 'Ra' will be left, then also it means Ram only. So 'Ram' or 'Ra' both mean the same i.e. destruction. The meaning for the Ravana is the person who destroys the forest. In detail, Maya is compared as forest and Gunas as trees, the person who destroys them is called as Ravana. He was called as Ravana Brahma in those days itself because he was a leader and such a great person that he took initiation to destroy Maya. Ravana Brahma was a great spiritual person. That's why he was also called as Trikala jnani. In Thraitha yugam Ravana Brahma was the only one person who knows that Indu Maha Samudhram is filled with divine power so he used to frequently have bath in ocean. At that time only he knows that if taken bath in Indu Maha Samudhram that divine power will get into the person's head. In those days there was so much power in Indu Maha Samudhram. But these days that power is not there. We will discuss regarding that later.

The Mystery of Bermuda Triangle

Ravana Brahma was born in Thraitha yugam and attained moksham (immortal), and made the name 'Srilanka' as a deserving name for the country. Just like how Indu country is the place of birth for the many jnani's, similarly, to make name 'Srilanka' as a deserving name for the country Ravana Brahma took birth in Srilanka and attained moksham (immortal). Ravana Brahma is not only jnani but he is a yogi, nobody knows this now. He has been projected as an ajnani (ignorant). It is purely our bad luck but nothing else, that not recognizing Ravana Brahma's greatness and decency. Our India though it is Indu country because of illusion, it has become Hindu country; the great Ravana Brahma was portrayed very cheaply. God has already told in Bhagavad gita, as time passes on, dharmas will become adharmas, previously the Indu's the followers of dharmas have become Hindu's following adharmas. God said when dharmas will change into adharmas; I will come on earth to keep up the dharmas. So we can expect, any time God may come to earth and change us as Indu's. Now with ignorance (ajnanam) the Dravidian's and Aryan's are having regional difference, and Aryan poets have portrayed Ravana as bad. With this people are unable to decide what is good and what is bad, and are unable to know the truth about Ravana and treating him as bad. In many aspects we have understood Ravana as a bad person. So, Ravana Brahma has become bad in every one's point of view. Let's take an example regarding this.

Sura means alcoholic drink which was consumed by Goddesses, this point is known by few but not by all. In those days, the alcohol which was consumed by Goddess is now-a-days known as Brandy, whisky etc. in those days those who consume Sura were known as Sura's. If not all but some knows that Sura's means goddess. Those who consumed Sura were known as Sura's and those who don't consume Sura were known as Asura's. At that time, those who declared Ravana Brahma as Asura have also declared Goddess as Sura. According to this now you tell, who is great? Ravana Brahma the Asura or the Sura Goddess? Now, see I will tell you another issue. One person said to a drunkard "no donkey will drink like this" then the drunkard said "you are correct because I am a human being I am drinking and you are a donkey you are not drinking". In the first person's point of view the person who drinks is a donkey but from drunkard point of view, the person who won't drink is equal to donkey. Similarly Ravana Brahma is Asura, he doesn't consume any Sura (alcoholic drink) so he has been known as Rakshasa. From this we can know that he is not understood properly.

The Mystery of Bermuda Triangle

Ravana Brahma has taken away Sita who was in the forest with this incident he has been portrayed as a bad man and ignorant (ajnani). He did not take Sita with any bad intention. Nearly 10 months Sita was under Ravana. Sita was given as a daughterly care by Ravana Brahma for that period. For her service ten maids were appointed. Weekly once he used to visit Sita along with his wife and used to know the where about's of Sita. He told the reason to Sita why she has been brought there. Ravana told to Sita that his death is in the hands of Rama, which he already informed his wife Mandodari. His death will happen at Srilanka only and that to because of Sita only. Rama will come to Srilanka, Ravana told all these to Sita. He also told that you will know in future what type of person Rama is. As Ravana is trikala jnani he already told his death time also to Sita. Sita dint feel at anytime that Ravana was bad. Sita could recognize that Ravana was a yogi and jnani. That's why she never spoke ill about Ravana any time.

If we go in-depth and try to know about Ravana Brahma's birth we will get to know the secret. Few may believe my words and few may not, secret means which is unknown to anyone. Ravana's birth is a secret, so for Atleast few should not know then only it will be a secret. Then only the meaning of the word secret will be sustained. That's why, if I tell it also only few will know it, everyone will not know. As we already discussed that there is some divine power around Srilanka. **That divine power wanted to show, what is divine knowledge on earth.** What is yogam? At last what is liberation? To show an example for people on earth and to give direct visibility about Jnanam, yogam, moksham that divine power has taken birth as Ravana Brahma. In this way a person was born in Lanka. A divine power was born on earth and was called as Ravana, Ravana Brahma. In this way that power has been called as Brahma and showed Jnanam, yogam in the form of Ravana in real life. At last according to Brahma Vidya conditions only he attained moksham. From this we can understand that Ravana Brahma is not an ordinary person, he is a power and it is understood that he showed the power of Jnana, yoga and moksha. From this we can understand the person who was born as Ravana Brahma is very great person. The people who portrayed him as a bad are real ignorant. We heard that Ravana Brahma has 10 heads and he is known as Dasa kanta (ten necks). In this, we can say the word Dasa Kanta is not correct. But from one aspect Dasa headed is correct. Ravana Brahma IQ (intelligence quotient) is equal to IQ of ten persons, that's why he is called as Dasa headed. From this we can say that Ravana Brahma has ten heads (with

regard to IQ) but it doesn't mean he has ten heads physically. Calling Ravana Brahma as Dasa kanta is not correct because no persons have ten heads when one don't have ten head how can have ten kanta (neck). So it is clear that calling Dasa kanta is not correct and it's false.

THE POWER IN THE OCEAN

We have already discussed that divine power is more in Indu Maha Samudhram that's why our country is named as Indu country and the country beneath is named as Srilanka. Now any one may ask a question, that is! Till now no scientist or researcher said that there is some power in Indu Maha Samudhram, on what base you are telling this, which no one had told before? For this my answer is! I told there is a divine power, but that won't have any proof to show or prove the divine power because divine power is not visible. So it cannot be shown visibly. Invisible divine power can be known by invisible intellect (buddhi). To know this, also it depends on once intellectual.

Previously there was divine power in Indu Maha Samudhram but now that power is not present there. Now some may question me, "how you are able to tell about that power, if asked by any one, to be on safer side you are saying now that power is not there, is it fact. For this our answer is, we said that power is not present at that place but we dint said that power is not there at all. The power previously which was in Indu Maha Samudhram has changed its place and is at another place. To understand more about that power I will give you some more details.

Human body is related to nature and it is made of 5 elements i.e. sky, fire, water, air and earth. In the human body which is made of 5 elements there is a power in the brain to have command over the 5 elements of the nature. This power which is present in human is known as 'Divine power or Atma power'. The Atma or Atma power in the body is not seen. The power of Atma is spread all over body and doing various works. Body is alive only if Atma is present in it. If Atma is not there body doesn't work. As Atma power is making body with 5 elements work similarly divine power makes the planets, asteroids, and meteor's works. In the universe there is no star or planet which doesn't have Atma. When Atma

The Mystery of Bermuda Triangle

power is not there that is equal to a dead body. The stars, asteroids and planets when Atma power leaves them they are similar to a dead body. As how a dead body gets decayed and gets destroyed similarly in the universe the planets, stars and asteroids with out Atma power they go back to a Dark hole and cannot be traced. **As humans have burial pits in the burial ground similarly planets and stars have black hole. The scientists are saying them black holes we have been calling them Dark holes.**

In this way the burial pit for human and the black holes for star and planets both are same or equal. As how a man is getting shrunk in the earth in the burial pit, similarly, the planets and stars are getting shrunk in the darkness of the black holes and cannot be traced. It is understood that, as humans are having graveyard in the same way planets are having black holes. The Atma power which is in a man's head is making him execute all the functions. Similarly for the ocean also there will be some divine power some where in the ocean and execute the functions. As we are telling that on earth in Indu Maha Samudhram that power is there. That divine power was present over there in krutha yugam, Thraitha yugam and Dwapara yugam but in kaliyugam from 3112 A.D. that power is not there. In kaliyugam that divine power was there till 2000 years but later it has shifted to northern America beside Florida State, it is located in 20 to 24 lakhs kilometers. Since 3112 years it is over there now. From there itself the power is being spread to all the places. As how the body is executing things with the help of power units in the body, similarly, with that divine power all the things have been executing on the earth. Now what we have said is the secret of that power which no scientists know about it and told about it. In Thraitha yugam Ravana knows about this power and now in kaliyugam we are revealing it. From the time of Ravana Brahma to now Prabodhananda yogeeshwarlu nothing was mentioned about this divine power.

THE POWER TRIANGLE – BERMUDA TRIANGLE

The sun which is far away from earth but its rays are passing through out the world, similarly the Atma power which is in the head, spreads its power to the whole body and the divine power which is in the ocean, is at one place but is spreading its power on the earth and executing things and giving power to the 5 elements, which are the part of nature and executing things how & when they have to be done.

Through spiritual study we came to know that the Brahma nadi which is in the head is giving power to all the parts which are made of 5 elements and according to the Jeeva's deed. He is able to experience happiness & sorrows. Similarly, if the earth is compared to a body, then the power in the ocean is giving power to the parts of the earth, this is also according to spiritual study. From this we can know that the spiritual study in the body and outside the body, they are two. As we already told that, there are two types Bhutha's and Mahabhutha's. One can say Bhuthas means jeeva also. Mahabhutha's means sky, air, fire, water and earth. As we already said this in one of our writings titled "**Ghosts – Bhuthas the true incidents**". In this book what we discussed till now regarding the power in the ocean is about the 5 elements .i.e. water. One should remember that till now what all we discussed is only about water.

According to Brahma Vidya shastra, if there is Jeeva's presence then obviously Atma will also be there. Whatever we are discussing, it should be scientific. We should not go across shastra's. Jeeva, Atma are something like twin Atma's. if one is present then other also should be there, when these two Atma's are there then obviously the third one also will be there, which is greater than these two i.e. Paramatma (the supreme soul). As we already discussed the first one is Jeevatma, second is Atma and the third one is Paramatma. Because of these three Atma's only "Thraitha doctrine" has been introduced. Knowing the methods of these three Atma's is real divine knowledge. If we go in details according to divine knowledge then jeeva is at one place in the body, Atma is spread all over the body. From this it is understood that Jeevatma is not all over the body only Atma is spread all over the body. If we come to the third Atma .i.e. Paramatma it is every where inside the body and outside the body. Jeevatma and Atma both are related to each other but Paramatma is not related to any Atma.

The Mystery of Bermuda Triangle

Jeevatma and Atma both are traveling together in birth & death. Paramatma doesn't mix up with Atma & Jeevatma at all. Paramatma is spread all over it doesn't travel from one place to another because it is everywhere, here and there. In a body there are three Atma's i.e. Jeevatma, Atma and Paramatma and among them Jeevatma and Atma are like twin's and Paramatma is special and he wont mix up with any of the Atma. This method is present in everybody and should be known to everybody that's why in our body parts our hands have three lines representing this rule. In our hand two lines starting individually and ending united and other line is totally different, it is not connected to any line. The three Atma's method in our body is in everybody's hand.

The Mystery of Bermuda Triangle

As told in a human body, Atma is present. Similarly, in planets, asteroid and star's bodies also Atma is present. Around 3112 years ago the three Atma's were in a triangular shape similar to the three lines seen in our hand in Indu Maha Samudhram. At that time nobody knows that the triangle is representing the three Atma's. In kaliyugam till 2000 years the triangle power was in Indu Maha Samudhram but from 3112 years onwards it has shifted to left side of northern America in the ocean it is in the shape of triangle. The Atma power is spread about 24 lakhs kilometers in the shape of triangle. Whatever I am telling from starting onwards, you might feel it as a wonder story and it is unbelievable. So to realize that my words are true let us discuss the incident which happened in 1950 September 16th a big ship got vanished at that particular triangular place. Previously also similar incident has happened at that same place to have base for my words that there is a power in the ocean is 1947 December 5th at a time 6 aircrafts also got disappeared. But at that time it was not realized that the planes were disappeared because of the invisible power in the ocean. When a steamer disappeared in 1950 then people understood that there is an invisible power at that place. Everybody knows that at a particular place a ship was disappeared but how it got disappeared no one knows. Later also at that triangular place some planes, ships got disappeared. It was a confused stage that how was it happening. To know that secret many scientists and researchers tried but those who went for research went missing and couldn't able to traced back. From these others were scared and left the idea of research over there. From then onwards that particular area was recognised and abandoned. So that nobody goes there. That particular area is named as "Bermuda triangle". Many of them know that the Bermuda triangle in the ocean is a dangerous place. But nobody knows why it is happening? Who is doing like this? This is unknown secret.

In the year 1938 a ship which was carrying 5500 tons weight disappeared in a span of one or two minutes. There are no evidences about broke down of ship or it is drowned. The people who were researching this said that "what might be happened to such a big ship only God and ocean knows, but no one else" a war plane while going in the sky went into that area, very little portion. Because it had wireless connections with the departure station the pilot could inform to the station what was happening. As the plane entered the area of Bermuda triangle the points of the meters in the dash board were just rotating fast, with that the speed of the plane was unknown and in which direction it was traveling even that was unknown. The meters did not even show on how much height was the plane

The Mystery of Bermuda Triangle

flying. The pilot informed to the station master whatever was happening over there. The plane was not flying according to the pilot's instructions. The pilot was in total confusion stage. Mean while the clouds surrounded the plane and in between there was a cave seen. Plane went into that cave till then pilot was informing after that what happened he couldn't tell. Meanwhile the radio connection of the plane got disconnected. It is not known what had happened but later that plane was untraceable and got disappeared. In this way some information was gathered by a plane. It was realized that the triangle which was recognized by America in that particular area it was happening like this but nobody understood what happened to the ships & planes. It remained as a mystery Bermuda triangle to the science. **Meaning of the Triangle is, which has three corners. Bermuda is the name of a small island. Accordingly it was named as Bermuda triangle.**

In the previous three Yuga's the divine power or Atma power was in the triangular shape in Indu Maha Samudhram. When it was there nobody knows about its shape or its power. Recently about 60 years ago the some came to know about the triangular shape which is in Atlantic Ocean. The triangular shaped power which was in Indu Maha Samudhram is presently beside the northern America. It is at Atlantic Ocean in the same shape as it was at Indu Maha Samudhram. That power which was at south India since 39 lakhs years. As 2000 passed in kaliyugam, at once it has changed its base from Indu Maha Samudhram to Atlantic Ocean. Behind this there will be a definite reason. Previously in kaliyugam 3112 years ago the power which was in triangle shape in Indu Maha Samudhram, now also it is in the same shape if we see the reasons, it follows like this:

According to spiritual study, it is known that 5 elements (pancha Bhuthas) are also having Atma. It might be any Bhutha (any living being) Atma will be there in its body. As we already discussed, not only Jeevatma and Atma but Paramatma will also be there. To represent the three Atma's message the power on the water is in the triangular shape. Jeevatma, Atma are like twins but the third one Paramatma is special than these two. To understand this in better way

The Mystery of Bermuda Triangle

it is seen that in the triangle also one corner is special which represents Paramatma. From below picture you can know the shape of the divine power which was in Indu Maha Samudhram and now at Atlantic Ocean.

As showing in the picture the power on the water is spread in triangle shape. In the picture the corners 1, 2 are Jeevatma and Atma. 1 is Jeevatma and 2 are Atma which has slight difference from corner 1. The line from corner 2 which is traveling towards Paramatma corner 3 is straight and equal. Similarly the line (corner 2) from Atma to Jeevatma is going straight upwards is 90 degree angle. It is further to state that the line from Jeevatma, the 1st corner towards the 3rd corner i.e. Paramatma, is since bent by 45 degree, the portion of the 1st corner is small than that of the portion of the 2nd corner. Whereas, the portion at the 3rd corner which is recognized as that of the Paramatma is longer in length and is different from the other two corners. The Jeevatma, Atma which are said as twins in the body are in a same row, the Paramatma is standing different than these two on other side. As similar to the two lines in our palm merge at one point and the third line is seen with a separate identity in the opposite it resembles as a triangular shape. It is an astonishing fact that the Jeevatma, Atma and Paramatma are in a triangular shape as the ocean which are according to God's dharma. In the Atlantic Ocean that particular place is a banned area. In that area both ships on water or planes in the sky also are totally untraceable and it is a mystery nobody knows about that.

The highly talented persons in the world also tried to know about it but even they went untraceable. At last by leaving that matter aside which nobody understood, that area has been declared as a prohibited area. There is Atma power (spiritual power) in that part of ocean in triangle shape. **Atma has arranged 3 corners to show that wherever Atma is there, there will be Jeevatma**

The Mystery of Bermuda Triangle

and Paramatma together. One who knows the Atma knowledge which is in between Jeevatma and Paramatma, he is called as Atma jnani. A person if not Atma jnani and might be enjoying good status and positions on earth but still Atma considers him as a person who doesn't have respect towards Atma. According to this formula, the pilots, captains who went near Bermuda triangle are not Atma jnani's that's why they went untraceable in that power. The vehicles which were driven by them also disappeared. Many scientists also who doesn't have Atma Jnanam when went near that place also got disappeared. The one who knows Atma Jnanam if so goes to that place nothing will happen to him though it is said as a dangerous place. Such person will have the backing of the spiritual power. The person spiritually enlightened and the person having knowledge of Brahma Vidya Shastram, they may go near that triangle how many ever times, nothing will happen to them and there will be no danger for them. Till now no such persons have gone to that place.

In the Atlantic Ocean which is beside the America, from past 200 – 300 years some of the planes, ships got disappeared. Some knows that those which went to that place dint return but they don't know that either they got submerged in the ocean or got burst. Nobody answered these questions because to answer them there is no evidence or base. If anybody asks me these questions I can easily escape asking saying that highly intelligent scientists and highly educated people could not gave explanations then how can I? But I won't escape like that. Till now what ever has been in this book are all secrets and nobody knows them. By disclosing several secrets and not disclosing the curious facts doesn't look good. I will not approach the five shastra's in the world they are, no way related to me. But here questions are related to the 6th shastra i.e. Brahma Vidya shastra. So, disclosing things which are related to Brahma Vidya shastra in my duty.

There are incidents where ships got submerged in ocean either while starting or leaving to Florida. It may be some technical problem or something else but we can't say exactly that they submerged near Bermuda triangle. In 1938 march, a big ship which was 426 feet long and carrying 39 crew members and 5500 tons weight which was traveling from Britain to America with in 2 minutes went missing. In fact that ship went missing at Bermuda triangle area only. Though it was declared from 1950 onwards that they went missing in Bermuda triangle, but what am saying is even the ship went missing in 1938 is also at Bermuda triangle only. To understand how they went missing in the ocean, lets us take the instance

The Mystery of Bermuda Triangle

of the ship which went missing in 1938, which carried 5500 tons weight. If we understand about all the things which are missing at this triangle.

The heavy ship which was traveling from Britain to Florida by mistake entered the area of Bermuda triangle. They don't know that there is a danger at that place. On that day the ship which was 426 feet long and carrying 39 crew members, a cloud came across that ship entered into the cloud it took nearly one minute or one and half minute to go into the cloud. Nothing has happened to the ship or to the crew members. Just the ship entered into the cloud which came across the way, was like thick smoke. After sometime cloud got melted and disappeared. But the ship was not traced. What happened to the big ship within a minute? Did it met with any accident or broke down into pieces? What happened to the 5500 tons material? Did the ship got sunk into ocean? So many questions are arising, the answer for these questions are like this,

Q.1) what happened to the ship?

Ans: Nothing happened to ship

Q.2) did it broke down?

Ans: no

Q.3) did it met with any accident?

Ans: no accident took place.

Q.4) did the people in the ship die?

Ans: not even a single member died or got injured.

Q.5) what happened to the material in the ship?

Ans: nothing happened to material. It is as it was.

Q.6) did the ship got sunk totally?

Ans: no, not at all

The Mystery of Bermuda Triangle

After knowing these answers for all the questions at last a question may arise, if nothing has happened then where is the ship? For this our answer would be like this! Normally the ship went into the cloud around one and half minute. The ship which went into the cloud like that later after few minutes it came out. But we only know the ship entering the cloud. After entering into the cloud it was not connected to any Radar. As far as I know it was not seen when the ship was coming out. Cloud got melted and was not seen. "Now some may ask me that the ship which was not traceable for the radar association also, how you could tell that it came out normally after some time. The ship which was not seen to any body how could you know? Are you telling knowingly?" there is chance of asking me like this. For this the reply is, I know very well that the answer which I am telling is a question mark for everybody. Not only that but they might think am unsound mind? I know that every body will be in a confused stage. But as I very well know what happened that's why I am telling. You might think like that because you don't know what happened. If we keenly observe what has happened there without knowing by you it is like this!

The captain of the huge ship, Capt. Parslow and his assistants have as usually steered the ship through the cloud. After some time i.e. after nearly 15 minutes, it came out of the cloud. Capt. Parslow who steered the ship out of the cloud, driving the ship as usual looked the compass (diksoochi). At that time he noticed that the compass is not showing any direction, but displaying the directions erratically. Since it was not functioning properly, he looked at the other compass. Even that too was not functioning. He later looked at the speed-o-meter to know the speed of the ship, but it too was not functioning. Later, he noticed that every machine in the ship is not functioning properly. Then, he suspected whether the huge ship was traveling on the Atlantic Ocean or not, immediately he conveyed a message to the port through telegraph, the technology of which was prevailing at that time. But there was not response. At this juncture the crew was in a dilemma, but, since the ship was moving that had some carriage. The sky was visible and as usual the ship was moving on the sea, hence they had no suspicion. The only concern was lack of sunshine and the clouds looked stormy. They were not aware till then that they had lost contact with seaport. Traveling so, after few hours, they unexpectedly noticed the sea shore. Capt. Parslow was unable to recognize either the location or the shore. He could not view any seaport at that place. While the sea shore was located at half-a-kilometer distance, he stopped the

The Mystery of Bermuda Triangle

ship. There all the crew members got into small life boats and reached the shore. While moving in the small boats, they felt that the water was heavy. After reaching the shore they could ascertain that the place they landed is not at all in America. They found no trace of humans, up to the distance they could view. The place looked like a rocky terrain. At this juncture, they felt that the atmosphere is somewhat adverse for human habitation, within 10 to 15 minutes, they felt drowsy, apart a feeling that their stomach are full and tight. Wherever the crew sat they slipped into sleep at their places. The sequences were ascertained till their functioning of mind was normal. After they slipped into sleep, even I could not ascertain what happened next. Till such time they were in a conscious state of mind, their thoughts and actions reflected before me and were useful in determining, the reality. But what happened later has to be narrated on mere imaginations and there is no scope to tell what took place. Later, all the crew members did not come to a conscious state. Hence, nothing can be told.

Now, let us revert back to the questions raised about the ship and sea, the answers given by us. That ship doesn't meet with any accident, ship did not broke down and even crew members did not die or injured. The answers given by us are fact; ship reaching to a shore, the crew members used life boats to reach the shore, the members slipping into sleep all these are facts. Lets us come to the sources of imaginations now, after this incident in 1938, let us take another incident happened on 5th December 1947, mysterious disappearance of six US fighter planes over the Bermuda triangle and if look into details and what happened on that day

As part of military exercise, the five air force jets, the air force wing of USA was given a target by air force officers to rain bombs on the target in the sea. The five air force planes were to hit the target at 500 kms distance in the sea. The pilot air force jet would fly ahead, followed by the five air force jets. Its objective is to gather information in advance and there by instruct the five air force jets to bombard the designated targets. Accordingly, a few minutes after the pilot air force jet left the base, the five other air force jets followed it. the pilots of the fighter jets have to follow the path as directed by the ground officials of the air force. After the huge ship disappeared during 1938, after 9 years, i.e. in 1947, the jet fighters have disappeared. Even then, no one could understand the mysterious triangle, over the sea. Ultimately, during the year 1950, when another ship disappeared on 16th September, it was determined that these occurrences

The Mystery of Bermuda Triangle

were in fact taking place over a particular area of the sea. Concluding that the area is in a triangular shape, it was named as "Bermuda Triangle". Until then, nobody was aware that the area is in a triangle shape. During 1947, the air force jets have gone over the triangle area of the sea. When the pilot jet fighter first entered the area (triangle shaped), the pilot was unaware as to in which direction he was moving, at what height the jet was flying, at what distance and height is he from the ground and at what speed he was moving. All the equipments in the fighter jet have become non-functional. The light, in the fighter jet got switched on their own. The fighter jet was moving. It was surrounded by white clouds and there upon it seemed as if the jet passed into a cave of clouds through a visible path. At that time, a cloud come across and the jet fighter moved through it. Till such time, the pilot was well aware of what's going on.

The cloud that surrounded the jet passed after a while. By that time, the pilot could ascertain that the jet had already landed. The pilot was amazed at the sudden occurrence of the plane passing through a cloud and found it landed on the ground. He was dazed at the happening since the jet had not landed on the runway but on an ordinary ground. Apart this, he noticed yet another astonishing scene. That is, he found the other five jet planes following him at some distance. Spell-bound, he presumed, is it a dream or what? At the same time, unable to think further, he slipped into a state of sleep. All these sequences look like an unbelievable story. Apart from this, there is a chance to presume it as imaginary story. But, if we explain it with a right sense, something is likely to be understood.

In the view of the world, the mysterious disappearance of a huge ship in 1938, followed by the disappearance of six air force jet planes, have been concluded "lost". But, as an author of this book, I was not only able to record the sequence of events but also as to what actually took place there. Since the crew and pilots in both these incidents have slipped into a state of sleep, further information was snapped. Indeed, it is a tough task to analyze the minds of the people at that particular time when the events took place and to let the same narrated by my mind. With a firm resolve a person will be able to reach afresh a state of mind by constant practice of situations, the mind as a particular plane, to explore something in particular: At this stage, a person can know what he aspires to know from the memory recorder of mind. A firm resolve and concentration of mind is required to reach this state. The resolve should be made in advance to know such and such a thing and ensure that unwavering concentration is attained without any

The Mystery of Bermuda Triangle

hindrances. Even the aspect of exploring a particular thing should also be kept aloof. Getting into that state of voidness is the state which gives the desired fruit. In that state, the mind attains "Brahma Yogam" remaining a while in such a state, the aspect which was decided to explore by the memory, views a live broadcast of the sequences of those persons minds, who were present at the time of occurrence of an event. It is totally with a strong resolve, who would be able to realize what the inner memory intends to explore from the annals of the past. Attaining the state of "Brahma Yogam" is hard, by mere control over the mind. Only those who attain a state of "Brahma Yogam" in a true sense with a strong resolve will be able to exploit the past events.

This aspect is not that easy as narrated. Whoever it may be, the one who conquers and controls the mind and obtains the state of "Brahma Yogam": even afterwards there is a possibility to forget what is intended to know. Out of a hundred, ninety persons would slip into a state of sleep after reaching the state of "Brahma Yogam", only those who succeed in not slipping into a state of sleep, such conscious person would succeed in fulfilling their intended objective to know a particular aspect. At that time such a person's mind can penetrate into the past event and can reach the mind of the person's related with the event and can personally note the information stored. It is a tougher task than attaining a state of "Brahma Yogam" to go into the past and know what actually took place. Any person, with a strong and unwavering resolve can penetrate into past by the medium of mind and can unravel the secrets by reading the layers of mind of the numbers related with the event. A person with such a resolve should succeed in controlling his own mind and self conscious. After repeated attempts, I was able to succeed and know the ultimate thing. And, basing on the intended subject matter explained I was able to narrate the sequence of the event. With the very moment when mind of the person related with the event slips into a state of sleep' the later happenings cannot be unfolded, likewise all the sequences of the events which took place during 1938 and 1947 were unfolded only until the persons involved with the events were in a conscious state. Since they slipped into a state of sleep later, their minds became inactive and what happened next was not know.

The later happenings have been told by purely imagination but cannot be told as witnessed happening. Even I too have come to an imaginative conclusion as to what might have happened. Hence, what might have took place in the later

The Mystery of Bermuda Triangle

stages; it may be true as also equally untrue. What was told earlier about the incidents which took place with regard to the big cargo ship or the airforce planes is infact true. One huge ship and six planes involved in the mysterious disappearance though the incidents took place at different times, both the incidents almost relate with each other. The huge ship, though passed through the cloud, it seemed as if it is sailing over the sea. Later the ship crew reached the shore with the help of life boats. Whereas, the pilot leading the air force planes, after travelling through the cloud, surprisingly found him on the ground. Similarly, the five war planes which followed him were seen landed at some distance in the back. But to the external world, both the ship and the war planes which have mysteriously disappeared after entering the cloud. Even though they disappeared to the external view, the flight and ship crew were unharmed and safe for some time. In the view of the common people though they disappeared mysteriously, the spiritually enlightened persons could view their presence. What is intended to be known here is who led the huge cargo ship and its crew to the shore? What is it that a cloud had come across? Likewise, how is it that the pilot of air force plane come across a cloud and once it passed through, how is it possible to find it stranded on ground? What is that power which could land the air force plane? How is that the five air force planes following it land there? What is that a cloud coming as a hurdle to the ship and planes? Where is that particular shore where the ship crew landed and the ground where the planes landed? Is it that both the places where the ship and planes landed were unknown to anyone? So many questions are emerging like this. Answers to all these questions are not possible to know either though the air force pilot as though Capt. Parslow. Since they slipped into a state of sleep there is no scope to get answers from them. The only option left is, we have to answer ourselves on sheer assumptions and presumptions. Some of the guessing may be true and some may not be true. Hence what Iam going to tell may not be totally true.

My conclusion about the disappearance of a huge ship during 1938 over the Atlantic Ocean (Bermuda Triangle) is - on that particular day, the British ship sailed into the powerful triangular shaped field over Atlantic Ocean. Neither Cap. Parslow nor the other crew members had any spiritual knowledge. Only those who possess spiritual knowledge will have the ability to enter the powerful place. Those who disregard and disbelieve god and enter powerful field they are bound to face the fury of that invisible power. It is the reason why the fury is unleashed

The Mystery of Bermuda Triangle

on the unwise/ foolish person who entered the powerful triangle shaped field. During the Thraitha yuga itself, the 'Atma Shakthi' was in the Indian Ocean, took birth in a human form, as "Ravana Brahma" and "Ravana Brahma" lived as a role-model for spiritual enlightenment, self-realization and showed ways and means for humanity for attaining liberation. The "Atma Shakthi" implanting some of its own power in the bodily form of "Ravana Brahma" has put in its best efforts to impact ways and means for humanity as to how to get enlightened and how to reach the path of salvation (Moksha). People could not realize the greatness and objective of Ravana Brahma's birth, instead put a scar with ugly remarks by calling him a sex-maniac and a destructive person. This tendency of humans at that time enraged the power which was over the Indian Ocean. We have earlier revealed that the Triangular shaped power stationed over the Indian Ocean at that time is the same power stationed over the Atlantic Sea in the triangular shape, and a part of that power is the human form of "Ravana Brahma". It can be affirmed that there is no difference between "Ravana Brahma" of that time and the present power which is in a triangular shape over the Atlantic Ocean. Why not Ravana Brahma feels furious by the way people keep insulting him in an unfair way? Hence whenever unwise people enter the powerful triangular area over the ocean, the invisible power is getting anger. The power which shows respect for the wise persons is safeguarding and ensuring their safe passage is getting furious at others. It can, therefore be said that the power over the ocean had vented its anger over the crew members of the ship. Despite the grudge and anger, the power did not harm them. It gave a chance even at that time also to transform themselves as enlightened ones. Though the effect it puts to transform them as spiritually enlightened ones is a good gesture; taking them perpetually away from their families is definitely a punishment. As per my evaluation though the punishment looks a small one, for the victims it is a rigorous punishment. Those who are not spiritually enlightened will definitely call it a rigorous punishment.

In our earlier book titled "Ghosts – Bhuthas The True Incidents", it was not only described clearly but narrated about the role played by "Clouds" in the "God's Kingdom". By realizing the power which is over the Atlantic Ocean in a triangular shape, a cloud itself came on the ocean a small form just a kilometer away on the way the ship is heading to. As to how the ship is approaching it, the cloud ensured that its shape too is grown in size. As soon as the ship reached it,

The Mystery of Bermuda Triangle

the cloud surrounded the ship and thereby everything invisible for the ship. For nearly 10 to 15 minutes, though the ship crew felt that they were passing through the cloud; a mysterious thing happened during the span which either the ship crew members were aware or which anyone grasps. Within the short period, the cloud took away the huge ship to a planet which is crores and crores of miles away from the earth. That planet is not in the listed planets which we know. There was an ocean on that planet too. Hence, the cloud left the ship on the ocean of that planet too. Hence the cloud left the ship on the ocean of that planet, that too adjacent to the shore. As the ship was left on the ocean of that planet by the cloud, the crew had no doubt since they were sailing in the ship over the ocean. But they were totally unaware that they themselves and the ship had left the planet earth itself.

They got down from the ship and boarded the small life boats and reached on the shore and noticed the surroundings. They could either realize the alien place or the country and could not understand where they are. In the meantime, the cloud that brought the ship crew to the place, forced them to slip into a state of sleep. They all woke up after one hour. In that span of one hour, whatever the crew members had in the store of their memory that got deleted as similar to the memory deleted from a computer system. Since that time the ship crew became unaware of the past. They could realize that they had landed there through ship. Since their memory power had become blank, they were unaware of the later happenings. What might have happened afterwards is narrated on mere presumption but not gathered from any reliable sources. After waking up from a state of sleep, the ship crew members felt as if they were re-born again. Once the past is totally erased from memory it is a similar that even the past birth is a past affair. Though the body and life had not underwent any change it is equivalent with a new life. On the unknown planet like the earth, there also existed humans. All of them are spiritually enlightened humans and the humans from the earth got mingled with such enlightned humans. Since the earth borne humans of the enlightened planet, they have transformed into wise and enlightened persons. In a way, though it is a punishment for the missing ship crew members of planet earth, is it not a blessing in disguise for such meritorious transformation as spiritually enlightened persons! There is such a long story behind the events is the 'triangular shaped power' which is on the Atlantic Ocean.

The Mystery of Bermuda Triangle

Let us now discuss about the incident of disappearance of US war planes during the year 1947. The pilot war plane took off from the air base at first. Thereafter five more war planes took off within a few minutes gap. The pilot war plane which took-off from Florida air-base was flying over the triangular area over the Atlantic Ocean. It has travelled nearly 500 kms over the ocean from Florida. At that time, the entire communication system got jammed. That apart, communication got disconnected from the earth base. As also the communication with five other war planes following the pilot plane at 100 Kms distance was also disconnected. All the electronic meters, devices and equipment in the cockpit had been jammed. As such, the pilots were unaware as to, at what height and at what speed the planes were flying and at what distance the landing of flight is going to be. In that situation, the pilot got confused and unable to understand the cause, he made own efforts. At that stage too, the plane was still flying. At this moment, the pilot noticed the plane surrounded by clouds he noticed that the plane was flying through the vacant space between the clouds. After passing some distance a white cloud came across its path and the plane passed through it. Later, the pilot felt that the plane was cleared of the cloud and the flight was found landed on the ground. Backwards, he noticed the five planes were landed at some distance. Later, it so happened that the pilot felt drowsy and slipped into sleep. Afterwards, the five pilots of the war planes had slipped into a state of sleep. They were unaware of what happened next and we too are not aware of what followed later. But I am narrating by mere guess to what might have happened. I am not assuring that what I am going to tell is totally true. But, what is narrated up to the point of landing of the war planes is true. And the pilots regained their sense after one hour and by that time memory became totally blank. They experienced what the ship crew had earlier experienced. As such, they were unable to realize who they actually were. The sensational thing is that, the war planes too reached the same planet where the ship was forced to reach. The crew of the British ship and the pilots of the US war planes have landed on the same planet. But, neither the US nor the Britain was aware about the crew member's mysterious disappearance of both the ship and the war planes on the same alien planet.

Though persons from both countries have landed on the same alien planet, they could not express their nativity for the reason that their memory was totally deleted. There also people existed on the planet and it so happened that at last they all mingled with the humans living over there. The humans living over the

The Mystery of Bermuda Triangle

planet are tall personalities ranging from seven to nine feet height. Those earthly humans who landed on that planet were five to six feet height. They looked too short before the people of that alien planet. Not only that, their intelligence is far superior than that of the humans of earth. In our view the crew members were intelligent who drove the ship over rough seas and capable pilots who fly modern war planes. The people of that planet seemed extra ordinary intellectuals who are far ahead in all spheres than the humans on the earth. Even in spirituality they seemed to be shaper than these people. If a person in any village is not spiritually enlightened, he is looked upon as a fool and driven out of the place. Birth of such persons is said to be grave a mistake. The entire population on that planet is leading a peaceful life with spiritual enlightenment. They are not at all involved in any politics like us. Whoever possesses 'Atma Knowledge' and a yogi in that place; he is the king of the planet. He rules that planet without any selfish motives. Those working under his governance are all spiritually enlightened ones. And the persons from the earth, who landed in such a kingdom, have transformed themselves and became enlightened persons on par with those living on that planet.

The residents of that planet did not show any interest in the persons who were new to the planet. They were not curious even to know from which place they have come. They were well aware of similar persons and animals had come to their planet in earlier also. They were also aware that some invisible power is behind such happenings, where humans and animals are landing on their planet. And, they were also aware of the fact that their memory power of such people becomes blank. They used to tell their own people who were not aware about the new persons and animals landing on their planet that these new people are brought to their planet by breaking up their bond with family and relatives apart of punishment for the sins committed by them. The residents of the planet were enriched with true knowledge (jnanam) and believed that the God is that invisible force who is behind such mysterious occurrences.

The Mystery of Bermuda Triangle

The people of the alien planet were of the opinion that the persons who came to their planet from an unknown origin are pure sinners, as a punishment they were brought over there. We have to accept this as absolute truth. Why because, what the people of alien planet are anticipating by all means is true. But, due to our foolishness, we are unable to realize this. Let us compare incidents of such nature committed by people on the earth. As per law, whoever commits a sin is liable for punishment. If a court imposes a punishment of undergoing imprisonment, ignoring his wife, children, relatives and friends that person would be jailed. Being provided with food and water, the only punishment he feels he is undergoing is that, he is drawn away from his near and dear ones. Hence, it can be ascertained that this is the mode of punishment imposed on persons who indulge in unlawful and unsocial activities. As similar to this is the punishment imposed by the invisible divine force. Those who speak against the divinely principles and commit unsocial acts detrimental to the interests of divine laws; such persons are imposed the same punishment of drawing them away from their near and dear ones.

Here a question may arise. That is, if a person is punished by taking him away from near and dear ones; recollecting them by means of memory adds more misery to the punished ones. But, there would not be any sort of mental suffering to those who are taken captive to the alien planet, since their memory is totally erased. And, such persons have no scope to recollect their near and dear ones. If such is the case, one may ask, how come it will be a punishment? In fact, by all means this question suits best. Our response to this is.... The cloud has twin motives to capture the ship and air force crew over the Bermuda Triangle area. One is, they should be punished; the second one is they should be spiritually awakened. Punishment is implemented as per fate, whoever, enriched with (jnanam) is not possible through the "action" of deeds (karma). It comes through the means of "faith" as (Shraddha). Whereas, the persons who are taken to the alien planet have no "faith" (Shraddha) on the jnanam. As such, there is no scope for such persons to enrich themselves with true knowledge and become jnanis. Apart, since their memory is erased there is no scope to experience the suffering of forgone life. In these circumstances, they either have a scope to suffer the punishment or experience the bliss of "true knowledge". One may suspect this theory by questioning. What is the meaning in saying that the invisible divine force, took them away from planet earth with twin motive to the alien

The Mystery of Bermuda Triangle

planet. Our answer for this would be. If an invisible divine force undertakes a task, it shall be fulfilled by all means. If not, the invisible force would not attempt at all. Though, the required 'memory' power as well as the required 'faith' does not exist in the persons undergoing punishment, they are being punished. And as well they are enriched with 'true knowledge'. But how?

The God, in advance had created a system to ensure that humans experience even the impossible of experiences and that is 'the state of dreaming'. In that state, a person would be experiencing a state of bliss never experienced in a 'state of dreaming' to fly like a bird in the sky. Even impossible things become possible in dreams. The person who was taken to the alien planet could not recollect the past even in the 'state of consciousness' due to deletion of entire memory. As such, such a person is detached from mental agony relating to the past. Whereas, in the 'state of dreaming' (which is different from the 'state of consciousness'), a person's memory is well intact and hence such a person is bound to experience mental emotions. The 'state of dreaming' is neither time-bound nor has any time-schedule. Hence, the amount of pain experienced in a year's time can be experienced within a ten minute span in a 'state of dreaming'. Changes with regard to time and form occur within no time. Though at a quick pace one experiences them, one cannot realize the fact. If this state is compared with the 'state of consciousness', everything looks an illusion (Maya). Events which seem impossible do occur in dreams. A dog appears initially in a 'state of dreams' and within no time transforms into a ferocious lion. In that state, we can either realize it or can conclude as to how the event could happen. Hence, it can be said that the 'state of dreams'. Therefore, the persons are likely to undergo happiness and sad which they ought to experience, according to individual karma. In a 'state of dreams', which is unique by nature, a person is able to experience bliss and agony unrelated with the present life. As such, things which one cannot recollect in a 'state of consciousness', at times come to mind even in a 'state of dreams' and that experience is definitely felt.

Things and events unrelated to the existing phase of life are bound to come and such experiences are felt in a 'state of dreams'. Hence, the instances of past birth which are beyond the reach of memory can be felt in a 'state of dreams' in the present birth. These aspects strengthen the theory that those persons who landed on the alien planet, despite loss of memory, their Karma is still intact leaving them. Now, coming to the point of 'Jnanam' in Bhagavad-Gita god said

The Mystery of Bermuda Triangle

"Shraddhavaan labhathey Jnanam" it means that according to ones interest Jnanam will be known. 'How deep person thirsts' to acquire jnanam, so befitting would be the resultant outcome'... The invisible and triangular shaped power which seized the forty-five persons on earth and power landed them on alien planet were neither believers of God nor had any desire to explore what jnanam is? Since they had no desire, there is no question of showing curiosity over the aspect of jnanam. It can be ascertained from this fact that those who thirsts to acquire Jnanam, only such persons can acquire. If we analyze this deeply, a scientific reason can be found. If a person accidentally falls on paint colour, the result is, the colour sticks to him. Similarly, if colour paint accidentally falls on a person, same will be the result. Likewise, a person who is not at all interested on the path of Jnanam; he cannot become an enlightened person and he won't even attempt to explore it. So, is there any scope for such a person to become a jnanis? Here, God's words have to noticed, viz., 'Jnanam can be acquired only if a person concentrates on the form of God'. There cannot be a more befitting answer than that. This reply can be taken on behalf of humankind. But, there is another reply on behalf of God. That is ... it will be better to narrate it with an example.

During the year 1981, once I was sitting at Marina Beach in Chennai. Since it was evening hours, a large number of people were present there. Small vendors were moving here and there, selling miscellaneous food items. One such person came to me carrying boiled peanuts shouting about the specialty of the item. But I ignored his pleasing words and did not buy the boiled peanuts. In fact, I had no habit of taking small bits of food; apart I had no liking for peanuts. Three to four times the person passed by me and to attract my attention he was shouting that the boiled peanuts are hot and tasty. Since I had no interest to have them, I did not buy. The next time that person approached me directly and said, 'Even if you don't buy, I don't mind. But have them for time passes, saying so he kept four peanuts in my palm and left the place. Since he offered them without my willingness, that too free of cost, I had them and tasted really good. So, a desire started in me to have some more peanuts. Keeping quite till now, why did a desire arouse in me to buy the boiled peanuts? Yet, since the petty vendor gave a few peanuts free of cost and the desire to eat made me buy the peanuts and had them. What is to be noted here is that, though I am averse to eat peanuts and since the petty vendor placed them forcible in my hand, I had them.

The Mystery of Bermuda Triangle

Similarly, the person who is not at all interested to gain spiritual knowledge and he was never curious to know of it. He came across the spiritual propagators on several occasions; yet he neither went to the person nor showed any interest on the subject matter. Though the petty vendor was selling peanuts and those interested are buying them, I showed no interest in them. The peanuts which are like a source of 'enriching knowledge' and the petty vendor, a 'master preacher' of knowledge, commonly, those interested would relish and those not interested would avoid both. But, the master (Guru) who recognizes those who are not e himself will initiate measures to impact the essence of knowledge on his own. It won't be in 'karma' for a person to possess jnanam. The element of 'true knowledge exists only if the element of interest exists within. But there be any scope to know what true knowledge is. But, an element of curiosity creeps in to explore, after accidentally coming across a bit of jnanam. With this more and more interest would gradually occupy the mind and thereby the path for acquiring 'true knowledge' paves in. Initially I was not interested to have any peanuts. But, once I got them for free of cost and after relishing them, a desire started in me to have few more. **Similarly, those who ignore to enrich themselves with true knowledge, the spiritual power initially offer a source of knowledge of true self.**

To cut off the ever increasing level of ignorance of God in the humans living on earth, the power of God is creating a sort of inspiration in humanity. Once the element of spiritual attention is drawn by the God, it is responsibility of individual humans to gain in depth knowledge with interest, on their own. The same thing occurred during 1938 and 1947 when some persons disappeared on earth were forced to land on an alien planet. Compelled by circumstances, they could acquaint themselves to some extent with spiritual knowledge. Similarly they experienced the resultant fruit of merit and demerit in a state of dreams. It is the power located within the triangular shaped place over the ocean that has influenced the persons who trespassed into that power zone and the mysterious clouds caught them unawares and took them away to an alien planet. By a way they were punished in accordance to their destiny and by a way they were befitted to acquire the jnanam. The clouds have not only punished them but also provided an opportunity to gain spiritual benefit. That apart, in some instances, these mysterious clouds concentrated only on implementing punishments in accordance to individual karma; without providing the benefit to acquire the Jnanam. It is

The Mystery of Bermuda Triangle

not only humans but other living beings like animals which were punished in accordance to their karma. Even they too were taken away from one place to another. With this, it can be ascertained that it is the action initiated by the clouds over the Atlantic Ocean as the root cause for the mysterious disappearance of humans. To demonstrate this, the clouds are playing a mysterious role in the disappearance of humans from one place and making them appear at another alien place. Though these occurrences were taking place on the earth, people are unable to grasp the reality. This aspect was reiterated in an elaborate way in our earlier book, titled, 'Ghosts-Bhuthas The True Incidents' that mysterious clouds force land a person or a group from one place to another in accordance to their karma. One such incident is narrated below;

In the year 2010, the month of September a rainy season. In Hyderabad city (A.P., India) there were heavy rains. The low-lying areas in the city were filled off with rain waters. In one such place, big deep pits dug for construction of multi-stored building were also flooded with rain waters. The next day morning, local people noticed a 12-foot long crocodile in the waters. When the word spread, several people assembled there and officials from the forest department reached the place. They caught the crocodile and left the place. People were shocked as to how such a big reptile came to the place and the issue was closed left unanswered. Now, let us explore the possibilities. There was no favourable place around where crocodiles can survive, nor was there any forest area, lakes, rivers, water-beds etc. not less than two to three hundred kilometres away from the city, crocodiles exist and there was no scope either for the crocodiles was found in the thickly populated city like Hyderabad. Even there is no possibility for a crocodile to migrate long distances like other animal sects. As far as we know, crocodiles live in tanks and water beds until the whole of water gets dried up. In such a situation, when lakes, tanks and rivers were overflowing with heavy rain water, there is no necessity for a crocodile to come into a thickly human populated place. The place where it was found was a place where water resources never existed before. Then, how come it came into the water pits dug for building construction? It is not possible to come to the place un-noticed during night, that too under the streetlights of a densely populated area. Nobody, was able to give a reasonable or suitable answer. But, our answer for this is! The crocodile has not come over there from a distant place nor had someone brought it and left it there. Then, how come it came over there? This question remains. Yet, there is

The Mystery of Bermuda Triangle

an answer to it. That is; As to how the big ship, its crew and six air crafts have disappeared over the Bermuda Triangle and landed some lakhs of kilometers away on an alien planet for a particular purpose; similar is the case of crocodile which landed in a crowded place in Hyderabad city. A rain-filled cloud had brought the crocodile and left it in the water pit dug for construction purpose. Is it possible for a cloud to do so? A cloud which could mysteriously grab six war planes over the Bermuda Triangle and land them lakhs of miles away within minutes; the same was not repeated in the case of crocodile. The cloud ensured that the crocodile was in its custody invisible for few days and the power landed it in Hyderabad city. This theory may sound totally astonishing, but it was explained in advance in our book, titled 'Ghosts – Bhuthas The True Incidents'. The cloud which is capable of changing its shape has even the ability to hide something within it and can hide it invisibly from others.

Though the mysterious disappearance of big ship and six air-crafts over the Bermuda Triangle is a fact accepted by everyone; the theory that the cause of the disappearance is the cloud is not believed by anyone. The divine power is extended in a triangular shape over the Atlantic Ocean and it is the 'clouds' which are acting as the agents of the divinely power. The clouds drifting over the Atlantic Ocean, after touching the triangular shaped power zone are gaining invisible and mysterious power. After crossing over these clouds are demonstrating the power upon the creatures on the earth through the supreme power gained by them. But, boasting themselves as intellectuals, several people argue that what is visible is to be believed and what is invisible do not have any base for belief. To ensure that even such intellectuals should feel to rethink, these clouds are demonstrating their mysterious 'power and presence', not only over the Ocean but on the earth too. Even then, the so called intellectuals are ignoring these aspects. How can we call such people as intellectuals when they are not in a position to explain the mysterious clouds, but they should be in a position to explain a few of them. If this is not forthcoming from them; there is a scope to say that they are unaware of scientific knowledge and are immature.

"You are not aware about us. After coming across the mysterious clouds, make efforts at least now to know about us (cloud)". Throwing such challenge before humankind, the clouds are rendering a sort of work which is beyond the

The Mystery of Bermuda Triangle

grasp of human wit. Let us discuss the mysterious work carried out by the clouds which the humans are either able to grasp or understand. It was earlier told that the triangular shaped Bermuda Triangle is located close to the USA over the Atlantic Ocean and, since America is adjoining the Bermuda Triangle; more number of mysterious incidents are recurring at the instance of the power-filled clouds in that particular country. One day it so happened that three persons on some mission were flying in a chartered aircraft. Among the three, one person was keenly observing the beautiful nature on the ground. The place over which they were flying was full of some special stone mounds. Since the person was interested, he was observing the places very keenly. At some places, he noticed vertical stones of considerable height. Leaving this, the surroundings were full of wheat crops and that particular place is familiar for the natural-formation of sculpted-like stone structures and vast wheat crops. Since the destination of the persons in the chartered air craft was short, after an hour they were on their return journey on the same way. Naturally, the person who was keen in watching the nature's marvel was observing the beauty of nature from aboard aircraft. At that time, he was astonished to notice something amazing. In the vast spread wheat crop adjoining the naturally formed stone structures, he noticed an eye-pleasing figure on the ground, drawn as if with accurate dimensions.

It was a wheat crop spread in a vast agricultural field. Even deploying hundreds of persons; such an eye-pleasing shape cannot be formed within a wheat crop, that too within an hour's time. A portion of the vertical wheat crop which stood stiff looked bent towards the ground; while a portion of it looked intact and stiif. From out of these variations in the overall outlook of the wheat crop, there emerged a figure which resembled a beautiful drawing. And, to the birds eye-view from the sky it looked most pleasing and amazing. The kilometer long figure would not be visible to a person standing on the ground at that place. But, flying in the sky in a plane or a helicopter, the marvelous shape would be visible and pleased to the eyes of viewers. These beautiful forms and shapes as visible to the naked eye from the sky and photographed as they looked are displayed in the coming pages.

The Mystery of Bermuda Triangle

The Mystery of Bermuda Triangle

The Mystery of Bermuda Triangle

The Mystery of Bermuda Triangle

All the shapes reproduced on the pre-pages have originated at one place or the other in the regions of the United States of America; that too within a span of a single night. They were not created by human beings and they are called as "Crop Circles". People who have noticed these circles have different versions of talk. While atheists contend that these circles are the handiwork of humans, the believers of God argue that this cannot be possible overnight by human involvement and that some invisible spiritual power is behind the occurrences. And, there are some other persons who struggled hard to create the shapes. But it is very easy to identify the large circles shaped by human labour. As part of it, wooden planks were used as tools to flatten the crops and create circles shapes. Despite flattening the crop using heavy to heavy force by human, the non-bending nature of crop altered the quality of human-made circular shape. Hence, it can be determined that since the human-made circles shapes are indistinct; the circles which were distinctly formed overnight were not human made. Not only that the human-made crop-circles are indistinct in nature, it requires sufficient man power and sufficient time too. Though efforts were made to create perfect crop circles, they were easily recognised as human-made. As such, it can be concluded that the beautiful and perfect circles created within a span of few minutes is not the handiwork of humans. Yet, how are they formed? What sort of invisible power is behind the formation of these circles? The question remains a question.

The National Geographic Channel has relayed an exclusive program, titled 'Crop Circles' over the television network. The true incidents relayed by them in the 'Crop Circles' program was narrated as a mystery. Though no body was aware of how such mysterious things are taking place, we have earlier said that 'Clouds' are behind these happenings. To prove that they (clouds) too possess some power, the clouds are creating such crop circles. The cloud in the sky is able to pitch its power onto the surface of earth and within minutes is able to create huge crop circles shapes. The shape looks as if it is carved by a great sculptor. Since the wheat grass is stuck to the soil while it is cut apart, the circular shape created by the cloud is very clearly from the aerial eye view. You have noticed the crop circles created by the clouds in the above photos which are out of reach to human imaginations. We cannot relate or call them as such and such a particular photo. Such shapes are no where visible on the earth.

IS THERE ANY SIGNIFICANCE TO THE SHAPE OF A CROP CIRCLE

If the shapes of crop circles are observed, one can ascertain that such large shapes formed on the crop lands are beyond human creation and never before witnessed on the planet earth. And they looked as if they demonstrate some meaning in their different patterns of circles formations. If one is hell-bent to explore the mystery behind the formation of crop circles, one should first know the origin of its creator. Though we are saying that 'clouds' are creating these crop circles, people are suspecting that a 'great power' is behind the formation of these circles. Some of those who witnessed the formation of crop circles are saying like this. Once, a farmer after working on a tractor in his agricultural field during the night was returning back home on the tractor after midnight. Since it was night, there was darkness all around and at that time he noticed two huge glowing lights at a distance. The lights were not glowing on the surface of earth, but glowing at a height of over sixty to seventy feet in the sky. As soon as he noticed the lights, he observed that the lights were fast approaching towards him. While the tractor was moving, he noticed that the lights crossed and overtook him at no less than 100 kmph speed. As noticed by the farmer, other has also noticed such things happening now and then. They said that the light possessed unique radiance that was never-seen before by them. It so resulted that after a few days of the mysterious appearance of the light, people have noticed formation of crop circles in some or other place in the area. The circles appeared in a variety of shape that was never seen before and people assumed that there is some invisible power behind the formation of the crop circles.

In whatsoever angle people looked into the aspect, as per the best of my knowledge it is concluded that the creation of Crop Circles is the handiwork of clouds. And, if the aspect of '**light**' or '**radiance**' is looked into we had earlier ascertained that the clouds are immersed in the service of God in the kingdom of God. Similarly, there are crores of small planets in the celestial world which exist in the service of God. At times, they happen to roam across the planet earth. One such celestial object might have been the cause of the radiance. But there is no scope for the clouds to give a glowing look. While the clouds are shouldering major responsibilities, the small planets are shouldering small responsibilities. Whatever

The Mystery of Bermuda Triangle

duties are bound to be done in the universe, they are done by the entrusted ones at the right time. What is prescribed for a Government, viz., people and governance; similarly, in the kingdom of God, there too exist administrators to rule the living beings. Every human commits sins as well as virtuous deeds. In the process every passing moments counts. And, in execution of all such deeds, the important role of several planets, clouds and vital elements is invisible to humans. By executing the commands of will and wish, humans are not utilizing the discriminating power to realize what is good and what is bad. Let the consequences be adverse to others, human are merely concentrating on achieving their selfish ends. Without having a second thought or showing any concern for sin, humans are vying to fulfill their selfish desires. They are either aware or able to judge that there is some invisible power which is carefully watching and keeping a count of their sins and virtuous deeds; for which acts they are bound to be suitable punished. A rich person thinks that no one can stop him from whatever he intends to do. A politician boasts with ego thinking that no body can create hurdles to his intentions. Whoever it is, a multi-millionaire, a politician or an official of highest cadre- they are unable to realize that the force that is bound to punish them for their faults do exist in their legs, joints, body and eyes. If a human is leading a life, there is an invisible power which watches and follows his every action and there is another power which keeps on implementing the desired punishments. Every human should remember this fact. By considering this aspect, it can be ascertained that there are more number of invisible forces which are ruling the humanity than that of the number of living humans in the world.

It was perhaps the radiance of a small planet or a celestial object that was noticed by the farmer. Clouds are more powerful than the planets. They can create crop circles on their own without any assistance from planets. The circles are created in several patterns which you might have noticed from the above pictures. Most of the patterns are circular in shape and cone-shaped angles are rarely seen. Hence they are called as circles. Apart from the different and few circles depicted above, there also exist various types of circle formations. Among the crop circles depicted above, some of the circles comprise of the three crescent-shaped (half moon) circles and some other with three round-shaped circles. Since number 'three' is significantly noticed in the crop circles, they reflect the significance of the three Atma's namely Jeevatma, Atma and Paramatma. Next, the visible marks of crescent shape (half moon) reflect the relation with Jnanam (divine

The Mystery of Bermuda Triangle

knowledge). In whatever pattern they appear within the circles, in one way or the other the shapes co-relate with soul and knowledge. Since the crop circles are created by clouds, they definitely bear distinctive significance. But, we cannot pin-point as to what the unique feature is. What we cannot draw on a white paper with a pen, is it not astonishing to find such shapes drawn (created) on the vast crop lands? It is negligence on the part of scientists to keep quiet without unfolding the mystery.

Even in these modern scientific days we are unable to solve either the mystery of Bermuda triangle or the overnight formation of huge crop circles. This shows how far we are scientifically advanced. We have categorized science into two wings, viz., science relating to the human world and the science relating to the Paramatma. We are calling the science relating to the Paramatma as "**Super science**", whereas, the awareness which people have about as '**normal science**' or '**General science**'. With the depth of present science there is no scope for people to analyze and ascertain the Divine power. As such, they could not explore the mystery behind the Bermuda triangle and the formation of mysterious crop circles. If we aspire to discover the mystery behind the Bermuda triangle over the Atlantic Ocean and the mysterious formation of crop circles on the earth, we have to take the assistance of 'Super Science'. Some may question, where is the origin of this new science, which is called as 'super science'? it can be said that the 'super science' in fact exists as the sixth shastra of Brahma- Vidya- shastra. If one gets familiar with 'super science', there cannot be any secret beyond that divine knowledge. Having command over general science, human are boasting themselves as highly intellectuals. But, their intelligence is not matching to meet the parameters of 'super science'. Hence, they failed to explore the mystery behind the Bermuda triangle, crop circles, and flying saucers and about the Aliens. If the knowledge of 'super science' is acquired, not only one can know about the God but as well know about the invisible spiritual powers. Now, let us leave the subject of general science and concentrate on 'super science' to know about flying saucers and aliens.

FLYING SAUCERS – WHAT ARE THEY?

We have heard people from some countries greatly saying that they have sighted the 'flying saucers' in the sky. Some people have even said that they noticed the landing of 'flying saucers' and some 'aliens' coming out of it. If we examine their statements, it can be said that there do not exist any relation between the 'flying saucers' and the 'aliens' and they are two different entities. But, it's a fact that 'flying saucers' and 'aliens' both exist. And it is not at all true to say that aliens travel through the medium of flying saucers and descend on the earth. People who witnessed flying saucers across several nations have presumed that the flying saucer is the source for the aliens to travel from alien planet to earth. The flying saucer is not at all a vehicle for transportation. In the outer space there exist crores of small planets in different shapes and sizes and they possess a source of power (life) within them. And, we have earlier said that they are part and parcel within the kingdom of God. Among the crores of small planets, these small and light planets are a type of planets called flying saucers and they are frequent visitors of planet earth. Yet, they are rarely sighted by the human on earth. To ensure their presence felt by earthly people, they might have perhaps made themselves visible to us. Humans are entitled for reincarnations, but, they are unaware of such occurrences. To ensure that this aspect is true, somewhere at some time, someone is able to recollect his past birth activities and events. And, if such a person's past events are examined and investigated, we find them to be true. With these sources, we are able to realize that a human has past births too. As similar to this is, there do exist several visible and invisible aliens' planets in different shapes and sizes. By feeling their presence now and then by way of flying saucers and extra terrestrial forms, we can compare and ascertain this fact.

It can be ascertained from the above that flying saucers are noticed since a long time back. These incidents are noticed in time and again in and around America. Perhaps it is during the year 1940, an incident relating to a flying saucer had occurred. That is, Americans who had on several occasions viewed the flying saucers were curious and who are inside them. One such day the flying saucer was noticed in the sky. Immediately four US war jets took off and chased them. The target of the war jets was to force-land the flying saucers and in case there is no chance they have to shoot them down. With that objective the war jets

The Mystery of Bermuda Triangle

approached the flying saucers. When they came very close, the flying saucers emitted a blue coloured smoke and enveloped in the smoke they were not visible. And, when the smoke became clear, the flying saucers just vanished. Whatever efforts were made, they became totally futile. And till date no information could be gathered. Some persons said that the flying saucer had crash landed, which is totally untrue. Till now, we have not come across any such incident. In fact, a flying saucer is neither a machine nor a vehicle. It is a small planet, with life intact and hence there is no scope for crash landing. Comparing the 'saucer shaped flying object' in the sky as a machine is absolutely wrong. Since the shape of the small planet flying in the sky is visible like a saucer shape, humans are mistaking it as a flying machine. What we are calling as 'flying saucers', in fact these saucer shaped small planets are shouldering their responsibility to set right the wrong doing humans. Hence, several such saucer-shaped small planets are frequenting the planet earth. But no one is aware that these saucer-shaped small planets are routinely frequenting the earth to punish a particular section (human) of wrong doers. Humans may be extremely intelligent, enjoying high status, having unaccountable riches and possess unique educational standards, yet, they are totally unaware of the punishment implemented in lieu of the merits and sins committed. To realize the adversaries of sins committed; one has to be familiar with the knowledge of spirituality. If such knowledge is lacking, a human cannot know the objective of his own birth. If he does not know what he is, how can he know about the outcome of 'karma'? Hence, there is no scope to know how the sins are taking shape, how they are getting accumulated and through whom are they (punishments) implemented. In the process, there is no chance to know that the flying saucers are a part and parcel in implementing punishments for the sins committed.

DO ALIENS EXIST?

We affirm positively for the question as to whether aliens exist. We have heard that aliens were noticed at some places just as flying saucers were sighted on the earth. Such news mostly appear in the newspapers and basing on such news, we have gathered the information and narrated the same. Though newspapers provided limited information, the remaining information was provided by us after conducting some research. If anybody questions me according to which research are you saying these, our answer is, one had to know the knowledge of super science, one can explain about things which even familiar scholars and scientists cannot say. Following the same procedure as explored in the case of flying saucers, now, we expose some facts about the aspect of aliens. We reiterate the theory that Aliens or Planetary bodies really exist. Let us see the narration about aliens. Those who are named and called as aliens are not truly aliens. We are calling aliens as extra terrestrials considering that they are not earthly creatures but have come from alien planet. In fact, aliens as they are called are not extra terrestrial creatures. They do not have any specific planet and they very much exist and belong to earth like other living human beings. Hence, they are not extra terrestrials from other planets, they to belong to planet earth.

The so called aliens are not only a part but also play a key role in the God's administration and kingdom. Invisible, they are present everywhere. What we going to narrate now is truth and a befitting example that invisible aliens were visible here and there to someone and proved their very existence. The days before this text was composed, an youngster hailing from Nalgonda District (Andhra Pradesh, India) was attending to nature's call during a night. And, at that time in the street light he noticed a shape of human head behind a tree. From between the branches of 15 feet tall trees the head like shape was peeping out. Without any fear, the youth recorded the event with his cell phone. The same was repeatedly shown by TV channels. If the recorded scenes in the cell phone are examined, it appeared that a form, nearly of the height of a tree with hands upto the waist was looking from behind the tree. The shape was looking like a blurred shadow without any clarity. Though in a physical shape it did not appear, it looked like a shadow on water. In whatever form it may be and whoever had sighted it or not, aliens do exist.

The Mystery of Bermuda Triangle

Though aliens are terrestrial bodies and since people are not aware of their existence on earth, they are called as extra terrestrials (aliens). We proclaim that aliens are terrestrial creatures only and not extra terrestrial bodies. They are the role players relating to the administrative aspects of the earth which are looked after by the God. Based on the above, it is evident that as part of ruling the earthly creatures, aliens are one among those who are carrying out their work. What we have found through the research conducted by us on aliens is that they are vehicular bodies carrying the cancer cells. They specifically store the cancer cells and carry with them wherever they move. Though invisible, the aliens appear at some place or the other to some one or the other. Their special task is to carry the cancer cells and infect the bodies of those humans who have committed grave sins in their past birth. Every activity and every sin of every human exist in the hands of 12 planets comprising the sun and the moon. These planets ensure that the sins committed by humans are suitably implemented with suitable punishments through the source of planets, allied planets, and bhootamu etc. Aliens are the species who are one among those under the control God's governance along with 12 planets comprising sun and the moon. The duty of the aliens is to act according to the words of governance and infect the sinner humans with the cancer cells they possess. If a person is diagnosed as suffering with cancer, it can definitely be said that the disease has come only from the aliens. It can be said with such certainty because there are no cancer cells in the world except with the aliens.

WHY ARE EARTHQUAKES TSUNAMI'S OCCURRING?

If there is a kingdom obviously it will have a capital city. Similarly it can be said that on earth in God's kingdom, the capital is '**Bermuda Triangle**' which is filled with divine power. Though we are saying God's kingdom, it is not ruled by God himself. God has given the authority to Prakruti, the kingdom which Prakruti is ruling is what we are saying as God's kingdom but it is not really ruled by God. It can be said that it is ruled by Prakruti. The sky (Ether), air, fire, water and earth are the five vital elements which are in Prakruti are bonded to the God's command and from the time creation. They are ruling the merits and sins of the living beings. Under the Prakruti (five elements) many working like Bhuttas, upabhuttas, graha's, upagraha's and many other which are related to Prakruti. The flying saucers, aliens also belong to the upagraha's. The kingdom which is created at the time of creation is being ruled by Prakruti sincerely (shradha) that we have been referring as God's kingdom, lively God is not doing anything. Everything is done by Prakruti only. We have been saying as God's ruling for the method which is being organized for the sins committed by living beings and human beings. It is known that God is greater than everything but the ruler is Prakruti. Nobody knows about God's kingdom. Human beings doesn't know that who are the key person's in God's ruling, in that who are smaller ones, who are greater ones it is unknown. If the ruler is not known then their ruling also is not known. Some of the details about these have been narrated in one of my narrations "Ghost—Bhutha's" The true incidents. In that book we have told that God's ruling is very rigorous and rigid and without any partiality.

How the Prakruti and its parts execute the deeds earned is explained with a small example about Aliens and how the aliens implement the punishment. For executing one particular deed, then to execute different deeds different kinds of Graha's, upagraha's, Bhuthas and upabhuttas are working with responsibility. Man is not having a concentration on sin, if any of our ancestors are reminding then also they are not thinking about it. Though they know they are committing mistake they are covering themselves and committing sins very easily. Man doesn't know that whether a small sin or a big sin, it is being counted and recorded in the body and to execute that a big process is working. The work is being distributed

The Mystery of Bermuda Triangle

among upagraha's, graha's, Bhutha's, upabhuttas and Maha Bhuthas accordingly the work is being distributed and made man to experience it. Maha Bhuthas are 5, Bhuthas are countless. Similarly upabhuttas are in some crores. On our earth Maha graha's are twelve, upagraha's are in many crores. There are many invisible eyes behind one man. Many powers are ready to execute his/her sins. Flying saucers and aliens also belong to upagraha's and there are many more each one is there to execute each type of sin.

Man has committed the sins and accordingly he is suffering with different types of diseases. If a disease arises in the back screen either a Graha or a Bhutha might have worked for it. Man is seeing only whatever is seen outside but he doesn't know what is happening inside the body. For human, many powers are executing the punishments for different types of sins committed. At a time only one will be experience it. For example : in a group of 10 members only one person is getting stomach ache so, only he is experiencing it but nobody else. Some times it happens that 10 members at a same time experience the karma. For example: when 10 people are traveling in a vehicle, if an accident takes place then all the ten will suffer injuries. Then the 10 members are experiencing karma as a group. Similarly some times a village, a whole area, a complete state or the whole country have to experience karma at a same time. Such different situations are headed by different graha's and Bhuthas.

To reveal this news I wanted to give an heading saying "earthquakes—Tsunamis how do they occur" on Friday date 11/03/2011 exactly at 12 noon my son called me and informed to watch TV, when earthquakes and tsunamis has taken place in the Japan country. Then I switched on the TV whatever I wanted to narrate was just in front of my eyes on TV. On the previous day I said with our members who were with me about Bermuda Triangle showing on the Globe that "the exact opposite places i.e. Indonesia and Japan are in danger. The power which is situated in Bermuda Triangle is very much angry on people. Its view is coming form down the earth and watching the area straight to it. So at that place some or the other time the Maha Bhuthas may create troubles to the people in that area". After I have said this to them, the very second day itself that power showed its anger on Japan, this was unexpected. As I was watching TV, the person who was with me on the other day had said, what you told has happened today itself. But it was astonishing for me because it just happened the 2nd day after we said.

The Mystery of Bermuda Triangle

The people who come to me to know divine knowledge have asked about the book "Triangle shaped secret", so we told that most of the matter will be about Bermuda triangle in this book. For their understanding we showed them the place which is said as Bermuda triangle on the Globe and explained them that in the ocean near to America, a triangle shape is situated on water near to the island Bermuda. So it is being called as Bermuda triangle. By not understanding about the incidents which are taking place over there, people think some devil is there so they have been calling it as "devil angle". We said to them that people who don't know have been calling like that but there is no devil over there. A divine power is existing at that place that power is behind all the incidents taking place over there. Not only had that but we already told that when ignorance increasing in people then the divine power will be vexed on human. So the straight area to that place i.e. in Indonesia tsunami has already occurred once but still there is no change in the people and developing more ignorance and not giving any value to divine knowledge so another disaster is going to take place by the triangle and danger may occur again. As we said these to them the next day it happened.

We have been narrating about the earthquakes & tsunamis after the recent incident of Japan. In this way when at a time a group of people i.e. the residents of a country are experiencing at a time, in these times not the small Grahas, small Bhuthas which are working the big Grahas, big Bhuthas are behind this incident. The Maha Bhuthas in the Prakruti are five. They are ether (sky), air, fire, water and earth. When air and fire get unite then they can trouble the people and kill them horribly. Sometimes air and water are getting united and trouble people and making them experience hell. Similarly when water and earth get united such incidents occur as happened in Japan like earthquake, tsunami occurs and all the people at a same time experiencing the sin. Sometime when only earth trouble in the form of earthquakes and all the buildings get destroyed and lot of people die. In case any part of Prakruti gets irritated, man cannot tolerate it. In Japan one from every four people is genius but in front of the Prakruti their intelligence did not work. In case any one part of Prakruti gets irritated there will be a tragedy among human beings. In a family all will die at a time in front of their eyes and though daughter is asking to save me, either mother can't save her or daughter can't save her mother, each one will hear other cry and have to die helplessly. The reason behind this is the sins committed by human beings.

The Mystery of Bermuda Triangle

The power which is in Atlantic Ocean was previously in Indian Ocean (Indu Maha Samudhram). We already told that power itself has taken birth as Ravana Brahma. In those days to show good way to develop interest on spiritual study, to set an example of Jnana yogam to man Ravana Brahma has taken birth. Though Ravana Brahma was an idol for Brahma Vidya shastra, at last man has projected him as a bad person. Man is totally dipped in doing sins. From Thraitha yogam to kaliyugam, day by day, man has become ignorant (ajnani). He is not recognizing spiritual study and insulting the yogi's who have learned it. the triangular power is very much furious on the people who are thinking they themselves as genius and great than the divine power which provides power for everything. It is unable to bear that people are in no angle obedient to divinity. So it wants to show the power of the Bermuda triangle which is the centre for all Bhuthas, Graha's, upagraha's, upabhuttas which are in Prakruti. So from the Telugu year Vikruthi it has been creating disasters through graha's, Bhutha's. As we already told previously only from the year 2010 A.D. (Vikruthi year) heat, rains, cold, and breeze everything will be more severe. Earthquakes, cyclones, tsunamis and volcano erupts will be more. Brahmam Garu has told in his kala Jnanam (future) that all the disaster will occur and human beings will get destroyed. He has expected everything and told the future before itself. Even he cried for one whole day (tears came from his statue at Dharmavaram, Ananthapur dist). Many have seen it but nobody knows why it so happened.

The power which was in Indu Maha Samudhram has recently some years back has shifted its base to island Bermuda. The power in the Indian Ocean has started revealing divine knowledge in south India and to reveal Indu dharmas. It has created some temples. The temples which reveal divine dharma are only in south India and no where else in the world. Though in the whole world the ignorance have increased but only in India that too only in south India there is a possibility of dharmas be alive and restarted again. To happen these and the reason behind the dharmas to be alive still is south India is the view of the power situated in Bermuda triangle in the India people who oppose divinity are being punished in next birth by experiencing hell through the Bhuthas and the Grahas by this power. Now-a-days according to an agenda only the earthquakes, tsunamis are occurring. If prayed to God in the hard situations also the one who is in ruling will not accept and leave. **Don't pray God in the tough times, because God is not trouble shooter. Even in tough time like tsunamis and earthquakes, if you pray for him, he supports his family member's only i.e. Bhuthas but will not**

support the ignorant people who are praying him. The Grahās and Bhūtas will not forget any of the sin committed by human beings but they will punish him for every sin.

From 1950 onwards man is developing in science and becoming more ignorant. He doesn't have any concentration on divine knowledge not only that but they are making the temple as the income generating centers. Some religious people are insulting jnani's. Such people have come to such stage that they are not understanding the divine knowledge which we are telling and treating us as a culprit. We have defined the word "Indu" as Jnanam (divine knowledge) without understanding what we are saying they have been threatening us to change that word. Not only one but in all aspects man has become ajnani (ignorant) and he is revolting towards God also. So, God is punishing man by creating earthquakes and tsunamis which his soldiers are executing.

Though so much is happening man is not using his intelligence in researching on divine knowledge but he is researching from the view of mundane knowledge and not knowing the exact reason but he is telling how the earthquakes, tsunamis are occurring but he is unable to know why they are occurring. He is trying to give the details of the incident but not trying to find out the reason behind it he is unable to know that the details which he is giving is also not correct. Either to give the exact reasons or details behind the incident one should know the Brahma Vidya shastra. One who doesn't know Brahma Vidya shastra will be able to see only physical power but he cannot see the subtle power. So one who doesn't know the sixth shastra i.e. Brahma Vidya shastra he cannot give either the details or reasons behind tsunamis, earthquakes or any natural disaster.

When earthquake occurs some have filmed the scenes in the camera if we see that videos then we start thinking about the things. When earthquakes occurred in Japan on March 11th 2011 the video camera in an office was switched on and has filmed the things happening there. So we could see the scene. We could see the computer systems and other items moving on the tables. The computer on the table was moving towards front and back and at last fell down. Accordingly we understood that the building also moved in the similar manner. Not only the incident on March 11th 2001 in Japan but the earthquakes wherever occurs will be similar the things in the houses will move front and back. When the things are moving like that might be earth is trembling from both the sides. According to

The Mystery of Bermuda Triangle

the info given by geographical researchers of the earthquakes that when movement occurs in the earth that movements are coming towards up and the earth is moving. Such movements of earth are called as earthquakes. If asked why are the movements occurring in earth then the answer is, the empty space anywhere on earth when that empty space gets demolished or when there is empty space between rocks then these rocks will move to that empty space that movements when reached to earth that is called as earthquakes, they have been telling. Not only that but also others giving some other reasons. If whatever they are telling is true then the movements should be in other way. It should not tremble front and back. In underground very depth when such movements occurs and reach to the ground the speed should get reduce when reached earth. In case if those vibrations come up also they should not come both the sides, they should come only one side, this matter has to be noticed. Here a question may arise that, what the researchers are saying is it true?

The fact is earthquakes occurs, buildings move front and back then the question here is, is it happening how the researchers are saying? If not is it happening in any other method? These questions are remaining as questions only: here another question is! Earth was created some crores of years back from then till now earthquakes have been occurring in some times and we can't say that in future it won't occur. Then there are many empty spaces in underground earth. If we go into depth then according, here a question arises that under the ground is totally empty space. I think what all question I am asking are facts. When comes about tsunamis here also some question arise. The people who are saying themselves as researcher and if we believe their words then it will become superstition. So we have to question and get the answers for them also, they have been telling that when earthquake occurs in ocean. Then tsunami occurs. Similarly when it is occurred on earth then the buildings are getting collapsed. Similarly when earthquake is occurring in water then it is tsunami. In the incident which took place on March 11th 2011 in Japan that was around 800 kms speed and water waves were around 30 feet height from the earth. It was said that by this, the Tokyo city has collapsed almost. If the earthquake in the water is the reason for occurring the tsunami then that much power is not seen in the earthquake for the vibrations in the ocean and for so high waves. The earthquake which is coming on earth, here earth is getting pressed downwards but not coming up. Then when earthquake occurred in water and earth is getting pressed inside,

The Mystery of Bermuda Triangle

then water should go inside but why the waves are coming upwards? For earthquakes very high buildings are not getting collapsed they are as it is. When the power can move the buildings and create vibrations in the ocean but cannot lift the water to so height. The power which can move buildings can push the water but it cannot push some hundreds of kilometers speed. Then how did that much speed come to the water in the ocean? This also remains as a question only.

It is fact that on March 11th 2011 in Japan the ocean waves came 30 feet height and 800 kms speed. But the information given by scientist or researchers is not believable. They are just creating a story related to incident and telling but they are not they are not truly doing any research and giving the information. They don't know the exact matter but telling something else because they think whatever they tell people will believe it. Actually they doesn't know the fact either in the matter of tsunami or earthquakes or in some other matters also, the people who think themselves as scientists and researchers doesn't know anything but they think that nobody knows as much they knows and people will believe whatever they say, that's why they have been so dare enough to say the things which are not at all facts. But we blindly believe their words but nobody are thinking about this. Let us discuss an example to show that whatever we are seeing we are not properly thinking about it. Everybody knows about the plane attack which took place in America WTC towers by the terrorists. The 100 floors building which was attacked by a plane nearly in 75th floor and fire arose. It might happened that, because there was fuel in the plane as soon as the plane dashed the building that floor and downwards two floors and upwards two floors also started blaze. Whatever happened there we watched live in the TV. If this is the case as we discussed only 5 to 6 floors fire accident has took place. But on that the all-quaida terrorists also thought just the people in plane and 5 to 6 floors will get damaged but they dint expect that such a big incident will take place. We can say that whatever happened was more than what the terrorists thought. In fact they have not come to break down the building. After seeing the incident the terrorists heads were astonished because their intention was not to do such a big incident and they dint expect also. They were very much happy because America got more loss than what they expected and what they wanted to do.

We have watched live in the TV the falling down of WTO towers one after the other. Not only we but everybody might have watched it. One tower fell down

The Mystery of Bermuda Triangle

at first. The fallen tower also resembled to the situation in Bhagavatam in which Vamana stamped Bali Chakravarthi into earth. Similarly the tower went straight into the earth as if it was stamped. The floor where the plane crashed had got demolished instead the down floors onwards the building went into earth as it was stamped. If we think over here we doubt that there is a power which humans could not know. The second tower also got pressed into earth as the first one. It is fact that the towers got demolished when terrorist attacked, everything happened in front of our eyes. If that is true then, the way the tower fell down does it match with the terrorists attack actually? This is the question raised here. The answer would be! The way towers fell down doesn't match at all for the terrorists attack. It has been told that the iron rods used in the concrete got melted and the towers fell down. As they told, is there any chance of iron rods getting melted for so many floors. No there is no chance!

For the falling down of the tower in America the plane attack is not at all the reason. Terrorists planned something and did little only. There at that place what all happened was without their knowledge. It can be easily said that some great power has worked for that, which the terrorists and people also doesn't know. We could know the things by the method the tower fell down. Some invisible power came and kept the leg on the tower and stamped them. Some may say that there are no invisible powers in science. For this we say the science in which you know are not there but in the science which we know are there **"the science which we know is super science i.e. Brahma Vidya shastra"** if that is known not only the towers incident in America, the earthquakes in Japan, tsunami in Indonesia and all these will be understood. All the questions raised in these incidents will get answer. According to our shastra, one Graha has stamped the tower in America, similarly tsunami in Indonesia occurred because of Bhuthas and the earthquakes in Japan on March 11th 2011 also there is Bhuthas. Behind this work we have been telling that a Graha in America and Bhutha in the case of Indonesia and Japan are present in the incidents. The power of graha's and Bhuthas doesn't come to anybodies notice. The graha's and Bhuthas doesn't do such incidents without the knowledge of the power situated at Bermuda triangle, Atlantic Ocean. **Bermuda triangle is the capital for God's kingdom by basing that power only and with its permission tsunami, earthquakes occur.** We can say that the incident took place on March 11th 2011; the earthquake in Japan did not take place without the knowledge of the power at Bermuda Triangle. So

The Mystery of Bermuda Triangle

many such incidents are taking place on earth but this fact is not realized by man. There are many secrets which man doesn't know there are many secrets which are happening and not known to the world science.

One who knows the sixth shastra i.e. Brahma Vidya shastra they will know about Graha's and Bhuthas. That's why in previous days one who knows spiritual knowledge was known about graha's and Bhuthas. In olden days to prove this Ravana Brahma in his life showed that he could even control sun, moon and other graha's. He proved that graha's respected his words. Some of the small Graha's even now respect yogi's words. Now-a-days people have become very ignorant and forgot that there is a shastra called Brahma Vidya shastra. Because that shastra is not known the Grahas and Bhuthas which are invisible are not known. Because they are not known how the disasters like tsunamis, earthquakes are occurring is also not known. For such people now what we are going to say will be unbelievable. **Though we are telling, without divine knowledge one will not understand them. To believe hundred percent what we are telling are facts one should have Atleast little divine knowledge**

CAN ATHEISTS BE TRANSFORMED INTO SPIRITUALISTS?

Whatever said, how well tried to convince, some foolish people are in the opinion that they are knowledgeable people and that they know everything and they only try to convince you that they know everything and they only try to convince you that whatever explained to them are not based on any science, and that they would not stand the test of scientific research. This we are well aware that they will not listen to what we say. Not being discouraged by such adamant people who in the name of science claim themselves to be knowledgeable, today the triangular-shaped power from the Atlantic Ocean had dispensed a part of its power to this country in the form of a human being. Because of the Triangle power, that person had remained a question to both the atheists and theists alike to make them realize. If either of the atheists or theists who can unearth the mystery of that person has to transform into a wise person, if not able to do so, would only be an unwise person and not a wise person. If a person is knowledgeable, has to explore the answer through science. In case, if a person can find an answer, even if that person however strongly believes to be an atheists, will have to be a wise person. Unless a person possesses scientific knowledge it may not be possible to give the answer. And if unable to find answer has to accept that he or she is not a knowledgeable person. In that case the answer is given, they claim themselves to be wise and knowledgeable person. We shall find out what puzzle that Triangle human being has put forth.

The news published in a news paper on 29/04/2010 was like this. A person aged 83 years, since 74 years has been living without food and water. In spite of being foodless and waterless he is healthy. His brain is still sharp like a 25 year old young man. A team of 30 Doctors have been performed various tests for months to know whether it is a fact; have declared that it is indeed true. Even who have seen him and still unable to believe it also have tested him. Several

others also have prepared to perform tests on him. The true extract news published on that date is produced hereunder:

**ఏడు దశాబ్దాలుగా..
ఏమీ తినకుండా..!**

ఈ ఫోటోలో కనిపిస్తున్న ప్రహ్లాద్ జానీ (మాతాజీ) వైద్యశాస్త్రానికి సవాల్ గా నిలిచారు. 74-ఏళ్లుగా ఎటువంటి ఆహార, పానీయాలు లేకుండా జీవిస్తున్న ఆయన వయసు 83 సంవత్సరాలు. అయినా ఎటువంటి అనారోగ్యం లేదు. మెదడు 25 ఏళ్ల యువకుని మెదడులాగా చురుగ్గా పని చేస్తోందని ఆయనను పరీక్షించిన 30 మంది వైద్య నిపుణుల బృందం తేల్చింది. ప్రస్తుతం ఆయన గుజరాత్ లోని అహ్మదాబాద్ స్టేర్లింగ్ ఆస్పత్రిలో ఉన్నారు. ఈ మిస్టరీని చేదించేందుకు డీఆర్ డీఈ శాస్త్రవేత్తలు రంగంలోకి దిగుతున్నారు.

The Mystery of Bermuda Triangle

This photo of Prahalad Jani (Mataji) has stood as a challenge for the medical Science. Living without food or drinks for 74 years, he is aged 83 years. But still, he has no complaint of ill health. A team of 30 doctors who have performed tests on him declared that his brain works sharp as that of a 25 years old young man. At present he is staying at hospital in Ahmedabad, Gujarat. A team of scientists from DRDE are about to swing into action to unearth this mystery.

It is known to everybody that food is essential for a person to work as well as also to stay healthy. As per physical science, body requires energy in the form of calories which are provided through the source of food. Likewise, to keep the body warm, oxygen is required through respiratory system and should reach each and every seven physical interconnected body tissues. The carbohydrates should reach each of the seven physical interconnected body tissues through the digestive system. The oxygen received through food intake from mouth would reach and every seven physical interconnected body tissues, the oxygen carried by the 'red blood cell' in the blood reaches each of the seven physical interconnected body tissues. Oxygen needs no permission of insulin to reach seven physical interconnected body tissues. These seven physical interconnected body tissues appear like a factory. While the fiber content or the glucose which goes inside that 'factory' is used as firewood, oxygen having the property of fire and the carbohydrates (glucose) are utilized as firewood through this burning process in the 'factory' and absorbed with the inherent power. Because of the inherent power, the glucose on one hand, oxygen on the other is being burnt in the process. This process is taking place all times. Because of this resultant heat, the tissues in the body are maintained at a particular temperature. Since every tissue bears a particular temperature, the body temperature is observed. It is only because of the fact that in any living body, in every tissue, the glucose is burnt by the oxygen. This is evident by the temperature of that living body. In the tissues, if the process of burning has to take place, both the elements if glucose and oxygen are essential. For this, food from mouth and oxygen from nostrils are required. With this, if a person is alive, as per physical sciences from one side 'oxygen' and from another side 'food', both are essential. Burning process will not commence in the absence of both. If the burning process does not take place, this body will get cool, leading to death of that person. To be alive; this burning process has to go on every moment. In order to make this process go on continuously, a person has to take food from one side and breathe-in air from the nostrils. So far, what

The Mystery of Bermuda Triangle

all is said is related to the fourth of the six shastras that we have, which is called physical sciences.

Now coming to the matter, we know that Prahald Jani of Gujarat State, aged 83 years till now; for the past 74 years not taken any food or water. Being without food and water is a big challenge in the field of physical sciences. As per the physical science, it is a fact that a person cannot survive without food. If at all it is questioned that a person can survive for about four to five days without food, then there may be a possibility of survival since there is an arrangement of Glycose stored in the body is converted into glucose and feeds the body. Hence, as long as the Glycose reserved in the body lasts, the person survives. Later, when the Glycose is exhausted the person is bound to die. This process is possible for a few days, but not possible even for a month. So far we have discussed about physical science and hence it is true. Whereas, against the principles of physical science, 83 year old Prahald Jani surviving is also true. These two are contrary to each other. A science can never be false. Against the principles of the science there is no scope for anybody to survive. Any one has to be true. Another one has to be false. But, science is always true. However, out of real experience a person surviving is also true. Here the scientists however hard they tried are unable to unearth anything. (Here, the scientists pulled their hair to unfold the mystery)

Here, however wise the person may be, however knowledgeable the person may be, he cannot be absolutely knowledgeable. At the same time he cannot be considered intelligent. To be a fully knowledgeable person, it had been a primary principle that a person should know about the sixth science. Only when the sixth science is known, such questions can be answered. It may be that the person empowered by the triangle power has posed a question to the knowledge and intelligence of mankind. With this happening, the intention of the triangle power could be too enlightened about the triangular power and explain the same to them. In spite of so many incidents taking place beneath the Ocean and the incidents like Prahald Jani taking place on this earth, mankind is rubbishing such things like a blind person. Despite the fact that humankind has no answer to break such questions, they are claiming to be wise and intelligent. They are ridiculing those who know about sixth science. Even when they have no answer to break the mystery of Bermuda Triangle, occurrence of earthquakes, having no answer as to how a person like Prahald Jani able to survive, still humans claim

The Mystery of Bermuda Triangle

to be most literate having scientific knowledge and highly intelligent. Is it not shameful! Without any spiritual knowledge, is there any difference between other living creatures on this earth, which like humans need sleep, food, work etc. Humans are unable to understand this fact and hence is there any difference between humans and other living creatures. We wish to remind that if you have to be a real scientist or a real wise person; one should possess the knowledge of the sixth science.

We said that the power stationed in the Bermuda Triangle is called spiritual power. In terms of human belief spiritual power is reverently spelled as godly power. Everything is considered as spiritual power beyond this creation and we should recollect that spiritual power is considered as Divine Power. Few scientists who are conducting research believe that "there could be some unique magnetic power due to radiation of sunlight. And, that's why innumerable aeroplanes and ships have met with accidents." This is a provisional observation of them. To support their theory, they could not show any concrete proof. Finally they stated that there could be some power existing there. Most of them say it is the magnetic power. What we say about the magnetic power is that magnetic power is different from the spiritual power. Magnetic power can be created by a man. But nobody can create spiritual power. Electrical power can be converted to magnetic power and magnetic power to electrical power. But spiritual power cannot be created with any sort of power. Like that, the Bermuda Triangle does possess some unique spiritual power. Spiritual power in all people in this universe but in different forms, but the power is one and same. Depending on the place, the spiritual power plays its role. If the spiritual power over the Ocean plays a particular role, the power in human being plays another. Spiritual power, though, being same in the universe, depending upon the place, it is performing a variety of works. In this universe, any living being is able to work; it is because of the soul. Going by that, every work done by human beings is being made to be done by the soul in their body. In this universe, though the soul is performing roles, though soul's sound being familiar to everyone, what is soul and its knowledge is not known to anybody.

Few consider life in a physical body as soul. Few consider power of God as soul. But no one knows that soul is neither of these two. Though the knowledge of the soul is important for human being, in the name of soul, he is gaining the knowledge of what is not soul.

The Mystery of Bermuda Triangle

In the past, Ravana Brahma, had applied three horizontal lines with Holy Ash over the Eshwara explained the importance of the placement of lines. The lower line indicates "Jeevatma", Whereas, the central line is very important to humankind because of the fact that it highlights the importance of the 'knowledge of soul' and hence applied (kumkum) over the line in the centre as a mark of its uniqueness. In the same way, he applied the theory for himself and made everybody to follow it. But today, even the promoters of spiritual knowledge have no proper means to explain what a soul is. They are not able to definitely explain what a soul is and what sort of duties it does perform. Many secrets are going to come out in the open if one understands what soul is. Now, let us revert back to the main issue. That 83 year old Prahalad Jani is having all the 26 parts in the body to perform specific tasks. These include the Atma (soul). Leaving the soul, rest of the 25 parts existed in his living body. While 25 parts in the body are performing the tasks, the body is able to sustain life. The required power for performing the tasks of the 25 parts in the body is reinforced by the Atma. According to this, we can ascertain that in every physical body the source for executing the work is through the power of the Atma (soul). If the physical body lacks the power of the 'Atma', there is no scope for it to exist and there cannot be any movement in the body. The 'soul' itself is the supreme head of the physical body. Like the power of soul stationed in the Atlantic Ocean in the shape of a triangular form, in a physical body the 'power of the soul' is situated in the head of a body from where the power is spread all across the human body.

It is the Triangular-shaped power that made Prahalad Jani survives without any food and water for the past 74 years. In fact, he is an example and an eye opener to the atheists, theists, innocents, intellects of the present times. Nine years after taking birth, he had stopped taking food. He desisted from taking any sort of liquid and solid food, and even water. Then onwards to till date, he is living a healthy life. Because of him, it had become a puzzle for the physical scientists. Though the subject relates to physical sciences, the scientists are unable to find an answer as to how he is able to live a healthy life without food. They can never be able to get it, because this is a subject matter relating to the Atma. Physical Scientists do not know what Atma is. The one and only *Brahmavidya Shastra* will be able to tell you about the soul. The answer as to how Prahalad Jani is able to survive without food and water will be available only with those who have knowledge of the sixth science. Leaving those who are familiar with the four

The Mystery of Bermuda Triangle

sciences when the same is asked with those who are familiar with sixth science and who possess ample knowledge of the soul, they would respond as follows. In accordance with the orders of the 'soul', the bodily functions take place and it is the 'soul' that commands control over the body. The power of the soul is spread in every atom of the body. There are crores of atoms in the body and every atom possesses the power of soul. We have earlier mentioned that the 'soul' which exists in every atom of the body ensures that whatever glucose and oxygen reach it; the same are burnt instantaneously. If that being the state in t of human body, what is taking place in the body of Prahalad Jani, who is born with the unique element Triangular-shaped power!

Prahalad Jani may be taking oxygen through nostrils, but not taking food from his mouth. Because of this, the oxygen passing through respiratory system reaches the blood cells in his body and through blood circulation moves to every tissue of the body. Such oxygen has the property of creating radiation. But even if oxygen is available to create radiation there is no glucose to burn. Since Prahalad Jani has not taken any food, glucose has not reached. The power of soul-spreading into each tissue in the body, mixes the glucose and oxygen and helps conduct the burning process. As stated, the 'soul' is the controller command of the whole body. Hence, the soul performs as per a person's karma i.e., in accordance with the acts or deeds. There is nothing in this body that can direct the soul and itself takes every step. If the soul decides to stop keeping the body warm, it will stop the process of burning the glucose and oxygen that reaches the body tissues. That is why, even when the oxygen is supplied to patients in the hospitals through nose and when glucose is supplied through blood veins; if the soul decides to reject the process, the process of burning will not take place at all. Then the temperature of the body falls down and the body turns cold and may lead to ultimate death of the patient. Even when the supply of oxygen or glucose is in short supply to the patient and if the soul opts to ensure regulating the process of burning, it sees to it that the patient survives. That is why, to make a person, either to survive or die, the soul acts as the control command. Here in the case of Prahalad Jani, only oxygen is supplied to the body but not glucose. Even then, the soul being the controller of the body ensured that oxygen is got burnt and temperature is maintained and thereby regulated the survival process. In the body tissues where glucose gets burnt, a sort of polluting ash is released and if the same is does not exit out of human body; it may lead to ill-health of the

The Mystery of Bermuda Triangle

person. Since the constituent of glucose is not available in the body of Prahalad Jani, the process of burning of glucose is not taking place. Yet the soul is performing the burning process of oxygen alone, hence, in his body there is no scope of release of polluted air. As such, Prahalad Jani is healthier than others. With this, it can be ascertained that if the soul favours, survival is possible even without food. This is amply proved in the case of 83 years old Prahalad Jani who's survival is possible even without food. The all powerful soul dwells even in your body. The soul in the body is ensuring the process of burning only with oxygen, even though glucose is not available. Even Prahalad Jani is not aware of this aspect. Did he indulge in this act after achieving something unique? No, not at all. In fact, he does not know anything. He is neither a saint nor a wise man. Though he bears nothing in special, the uniqueness of soul in his body brought him such fame.

The soul is the command control of any human body. The soul can make a crippled man walk, a dumb person talk. It can bring back to life even a dead person. Though a person is alive, in the eyes of all it can make the person look like as lifeless. When everybody concludes that a person is dead, surprisingly it (soul) can spring a surprise by bringing that person back to life. Soul possesses all control commands in the body and can do anything. Such is its authority over the body. But people are unable to recognize that such an authoritative soul do exist in a human body. Even Lord Krishna had made a mention of 'soul' and explained in detail about it in 'Bhagavad-Gita', in the chapter titled, 'Purushottama Prapthi Yoga'. He narrated about the existence of three souls, viz, Jeevatma, Atma, and Paramatma. And these three exist as purushas in every human body as KSHARUDU, AKSHARUDU, and PURUSHOTTAMUDU. Basing on the combination of these three, the philosophy of 'Thraitha Siddhantha' is propagated by us. When we speak on religious philosophy based on the three souls narrated in the 'Bhagavad-Gita' and comparing them with the 'Thraitha Siddhantha', our adversaries who have no knowledge about the Atma (soul) propagate that we are and Christians are promoting Christianity. The once prominent Induism has reached to such a state that they are unable to know the difference between their religion and that of the others.

The Mystery of Bermuda Triangle

Today, nobody is in a position to know what the soul is! Those making a few wonders are believed and called as Babas and those singing a few songs and delivering a few lectures are believed and called as Saints and chanting a few spiritual hymns by a person is considered by people as a scholar. But, these so-called Babas, Saints and Scholars have no knowledge about the soul (Atma). For this reason, in order to recognize the significance of the atma within human body, it went to the extent of inflicting punishment on the humankind. It is for this reason; the atma, stationed itself in the Bermuda Triangle area and caused the disappearance of so many aeroplanes and ships which passed through its area. By spreading its invisible power through the clouds, it ensured that those captured are moved to other planets. People who went there in the process were made to forget this world and by following the dictates of the alien world they were made to gain the knowledge of self. Such virtuous people who gained the knowledge of self; after taking re-birth on this earth are inclined towards spirituality and leading the life of enlightened persons on the earth. This was enforced by the soul itself to ensure that instead of people remaining totally ignorant; the self-enlightened people enlighten the ignorant people and spread awareness to some extent on this earth. To facilitate the ignorant and careless people to attain some knowledge, the soul ensured the mysterious disappearance of several people over the Bermuda Triangle. Apart, those people who ignore to realize the 'Power of soul' within, keep abusing the self-enlightened and saintly persons in possession of the 'Power of soul', - as a revenge to this with the assistance of the five vital elements, the 'Power of soul' is generating several natural calamities. Yet the humankind is facing the calamities with adamant attitude but is not able to ascertain with intellect as to at whose behalf these calamities are taking place. In order open the eyes of humankind and to throw light on the path of self-realization, the 'Power of soul' is making its best efforts. The case of Prahalad Jani is strange but unique one giving a rare opportunity intended to open the mind's eye of intellectuals to explore and know, what the 'Power of soul' is. But vexed with ignorant human approach in assessing things and assuming that there is no positive approach in human attitude, the soul; through the sources of people like us, is compelling us to explain about the 'soul' and the 'deeds of soul'. In spite of enforcing me to explore facts and explain the 'Power of soul' to the people; even then if people fail to listen, realize and follow the truth, they are bound to be punished by the 'Power of soul' and facing severe hardships and sufferings in life, better it would be to make efforts to know what spiritual knowledge is and what
